LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your group?

My criteria were: size, color, and shape of the lizards.

Did your teacher grade individual team efforts?

Yes, my teacher graded individual team efforts. We were given a list of questions to answer and we had to discuss our answers and then we had to write them down.

An adaptation is a structure or function that the organism has as a response to its environment. This ability to survive and reproduce is a particular adaptation. Provide one example and an explanation of an adaptation of the green lizard.

The green lizard has a green color that helps it blend in with its environment. This is an adaptation to its environment. The green lizard has a long tail that helps it jump and run.

Provide one evolutionary explanation for why diversifying for food would give a species a selective advantage (i.e., the group would have survived a longer time).

One evolutionary explanation for why diversifying for food would give a species a selective advantage is that it would allow the species to survive in a wider range of environments.
