of this book in about fifty hours This book also serves well for class instruction Most likely it will be used as a supplemental reference for courses like CNC Machining Design and Manufacturing Computer Aided Manufacturing or Computer Integrated Manufacturing This book should cover five to six weeks of class instruction depending on the course arrangement and the technical background of the students

Modcomp MAX IV System Processors Reference Guide, 1990 A user almost always faces a big problem when having to learn to use a new computer system The information necessary to use the system is often scattered throughout many different manuals The user also faces the problem of extracting the information really needed from each manual Very few computer vendors supply a single Users Guide or even a manual to help the new user locate the necessary manuals Modcomp is no exception to this Modcomp MAX IV requires that the user be familiar with the system file usage which adds to the problem At General Atomics there is an ever increasing need for new users to learn how to use the Modcomp computers This paper was written to provide a condensed Users Reference Guide for Modcomp computer users This manual should be of value not only to new users but any users that are not Modcomp computer systems experts This Users Reference Guide is intended to provided the basic information for the use of the various Modcomp System Processors necessary to create compile link edit and catalog a program Only the information necessary to provide the user with a basic understanding of the Systems Processors is included This document provides enough information for the majority of programmers to use the Modcomp computers without having to refer to any other manuals A lot of emphasis has been placed on the file description and usage for each of the System Processors This allows the user to understand how Modcomp MAX IV does things rather than just learning the system commands
