La acción médico-social contra el paludismo en la España metropolitana y colonial del siglo XX Esteban Rodríguez Ocaña,2003 Desde principios del Siglo XX hasta el momento en que se erradic el paludismo en Espa a al comienzo de los a os sesenta se produjeron una serie de avatares en las estrategias antipal dicas en nuestro pa s dentro de un proceso marcado no s lo por los avances en aspectos cient ficos b sicos y aplicados y por los recursos t cnicos disponibles sino tambi n por los intereses profesionales de una cierta categor a de expertos y por determinantes de tipo pol tico y socioecon mico entre los

que no podemos minimizar la Guerra Civil española. El análisis de estos procesos constituye el objetivo de este libro. La jurisdicción hispana se extendió durante la totalidad de esa época a territorios africanos donde las percepciones, los actores y las intervenciones tuvieron personalidad propia. La historia de las últimas colonias españolas es un terreno suficientemente poco trillado para convertir en apetecible cualquier incursión profesional en sus dominios. Sin embargo, nuestro interés por estudiar la lucha contra el paludismo en los territorios africanos bajo dominio español se relaciona en sus inicios más con la necesidad de conseguir agudizar nuestra mirada sobre las prácticas peninsulares. La tarea de los sanitarios que organizaron y llevaron a cabo la lucha antipalúdica tuvo mucho de misionera en ese sentido; estimamos conveniente incluir el estudio de lo que en el sentir de la época era una auténtica misión civilizadora colonial. Y eso a pesar de que como ocurrió en Guinea no puede hablarse de una verdadera campaña organizada contra el paludismo ni siquiera en lo que Njera denomina políticas anti parasitarias. Los autores de este estudio compartimos la opinión de que la reflexión historiográfica ayuda a entender mejor el mundo en que vivimos; este mundo donde se producen alrededor de 300 millones de casos de paludismo al año, o en su gran mayoría en el África subsahariana. Esclarecer las influencias, los intereses, las estrategias que entrecruzados forjaron nuestro destino nos puede hacer vivir más lucidamente el presente. Si algo contribuimos a ello que den cuenta nuestros lectores.

Implantable Cardiac Devices Technology David Korpas, 2014-05-13. Development in a majority of medicine branches today is based on technological advancement. This is the case in cardiology where medical devices designed to correct heart rhythm: pacemakers, cardioverters, defibrillators and biventricular systems are implanted in order to help a sick heart. Medical pacing devices today are only developed and produced globally by a few producers who make different technical solutions: algorithms, system parameters, etc. The book *Implantable Cardiac Devices Technology* is targeted at biomedical clinical engineers, technicians in practice, students of biomedical disciplines and all medical staff who are required to understand the basics of pacing technology. The book is comprised of fourteen chapters that are further subdivided according to specific topics. Chapters dealing with basic heart anatomy, physiology and arrhythmology are included for the sake of comprehensiveness. Chapters avoid the description of special functions but cover general procedures and parameters common for the systems of all producers. The book is intended to serve as a monothematic textbook. In order to make the text comprehensible and well arranged for a reader, references to professional literature are only provided once in a respective chapter.
