Opinion Writing and Case Preparation The City Law School,2024 *Computer Programs for Qualitative Data Analysis* Eben Weitzman,Matthew B. Miles,1995-02-02 For those interested in finding a computer application well suited for their own qualitative research or just learning more about the capabilities of the latest generation of computer software designed with text Computer Programs for Qualitative Data Analysis by Eben A Weitzman and Matthew B Miles probably represents the single investment they can make In Computer Programs for Qualitative Data Analysis Weitzman and Miles provide a critical in depth look at 24 separate applications The authors make an impressive team Weitzman is a professor of social and organizational psychology with an extensive computer background and Miles is a social psychologist who is well known in the field of qualitative research for co authoring a popular book on qualitative data analysis with A Michael Huberman Together the two researchers have produced an informative user friendly sourcebook that can save readers a significant amount of time and money when shopping for a software program for qualitative data analysis Weitzman and Miles clearly put a tremendous amount of work into Computer Programs for Qualitative Data Analysis they write their reviews of each application in remarkably lucid and jargon free language in a format reminiscent of Consumer Reports The level of detail in the reviews reflects their careful and thoughtful field testing of 24 software programs Reviews average about 10 pages each and actually show you what each application can do and every review includes a series of realistic visuals complete with helpful captions that display what the computer screen looks like when performing various functions with that specific computer program In addition to describing the special features of each computer program Weitzman and Miles discuss the strengths and weaknesses of every application and make explicit comparisons with other applications in the

same family Sage Publications deserves special credit for their role in publishing *Computer Programs for Qualitative Data Analysis*. Instead of issuing this book in hardcover and attaching a hefty price tag they released it as an oversized 8 1/2 by 11 inch paperback and made this valuable information available at a modest cost. *Computer Programs for Qualitative Data Analysis* is the most comprehensive resource on its subject currently available and is an excellent starting point for qualitative researchers interested in integrating computer technology more fully into their own data analysis strategies.

Harvard Educational Review The book by Weitzman Miles is one of many new books on computers and qualitative software and indeed a good one. The book is truly a user's book, one of the useful ones. After this first feeling of self confidence I just kept on reading the book and found very thorough and illuminative reviews of no less than 24 computer programs for qualitative analysis.

Renata Tesch initiated the work of making it easier for us to survey the qualitative analysis methods. Weitzman Miles carry on in the finest way. Nyhedsbrer Although the authors have a background in social and organizational psychology their expertise on qualitative research methods is relevant to gerontologists. The authors give a history of the use of computers in qualitative data analysis, describe the different types of programs and suggest future directions, but the bulk of this book is reviews of the software out there. Before you spend several hundred dollars on a software program, spend thirty and get this book.

T. L. Brink in *Clinical Gerontologist* Eben A. Weitzman and Matthew B. Miles's valuable sourcebook on computer programs is designed exclusively for those interested in qualitative data analysis. For qualitative researchers who want to learn or update their knowledge of the use of computer software: Choice. What program do I use to analyze my field notes? Eben A. Weitzman and Matthew B. Miles provide the information you need to make that decision intelligently: full descriptions, informed judgments and helpful comparisons. Anyone who does fieldwork needs this book.

Howard Becker, Department of Sociology, University of Washington, Seattle. This will be the standard work of reference for several years to come. We owe the authors a considerable debt of gratitude for all the work they have put into reviewing such a comprehensive range of software. The result is incredibly lucid.

Paul Atkinson, University of Wales, Cardiff. The book is absolutely perfect for my situation. I don't know how many readers will be in the position of purchasing software for respective labs, but those who are will be in for a real treat. The comprehensiveness of the reviews is more than adequate to determine whether a particular program meets the needs of an individual or group. It is the most comprehensive book of its kind for any kind of software that I have ever seen.

Steven E. Wolfel, Research Publishing Consultant. Making decisions about choosing software for qualitative data analysis can be intimidating and I think this book will be an excellent resource for those of us who are involved in this type of research. I found this to be an extremely well thought out and informative resource book. The detail is wonderful.

Kathleen R. Gilbert, Indiana University, Bloomington. Do you want to start, extend or update your use of computer software for qualitative data analysis? If so, this clear and user friendly guidebook is for you. Without assuming its reader has extensive computer experience, *Computer Programs for Qualitative Data Analysis* takes a

critical yet practical look at the wide range of software currently available. It gives detailed reviews of 24 programs in five major categories: text retrievers, textbase managers, code and retrieve programs, code based theory builders, and conceptual network builders, and gives ratings of more than 75 features per program. The authors also provide detailed guidance in operating each program. They help you to ask key questions about your computer use, the nature of your project, time line analyses, planned and the worksheets required to help you identify the programs best suited to your needs. Up to date and practical. **Computer Programs for Qualitative Data Analysis** is an absolute must have book for any qualitative researcher who uses or wants to use computer programs in analyses.

Legal Reminders for Architects Elizabeth Phillips, Meyrick Serjeantson, 2014-05-12. **Legal Reminders for Architects** provides a basic introduction to the range of legislation which encompasses all planning and building work in England and Wales. The book contains a summary of each law that may affect an architect and where appropriate suggestions for a suitable procedure to follow. It also explains less well known terms in planning, building and employment. The text is organized into 19 chapters which elucidates the legislation on such aspects as town and country planning, site appraisal, building control and health and safety. The laws governing the conduct of businesses and partnerships, the employment protection law and building regulations are elaborated as well. This book is intended for use by architects and architectural students.

Energy Research Abstracts, 1995 The User's Guide to Multidimensional Scaling Anthony Peter Macmillan Coxon, 1982 **A User's Guide to the Meade LXD55 and LXD75 Telescopes** Martin Peston, 2010-04-28. I have owned telescopes for over 25 years since I was a young lad. I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK. I am also a proud owner of an LXD75 SC 8. Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility. My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55.com website. From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them. Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before. Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage. There have been mixed reactions about its quality and performance. Hence this book is directed towards those who are new to Goto and the LXD telescope.
