Engineering Education John Heywood, 2006-01-24 A synthesis of nearly 2 000 articles to help make engineers better educators While a significant body of knowledge has evolved in the field of engineering education over the years much of the published information has been restricted to scholarly journals and has not found a broad audience This publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to help engineers become better educators devise more effective curricula and be more effective leaders and advocates in curriculum and research development The author's first objective is to provide an illustrative review of research and development in engineering education since 1960 His second objective is with the examples given to encourage the practice of classroom assessment and research and his third objective is to promote the idea of curriculum leadership The publication is divided into four main parts Part I demonstrates how the underpinnings of education history philosophy psychology sociology determine the aims and objectives of the curriculum and the curriculum's internal structure which integrates assessment content teaching and learning Part II focuses on the curriculum itself considering such key issues as content organization trends and change A chapter on interdisciplinary and integrated study and a chapter on project and problem based models of curriculum are included Part III examines problem solving creativity and design Part IV delves into teaching assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork The book ends with a

brief insightful forecast of the future of engineering education Because this is a practical tool and reference for engineers each chapter is self contained and may be read independently of the others Unlike other works in engineering education which are generally intended for educational researchers this publication is written not only for researchers in the field of engineering education but also for all engineers who teach All readers acquire a host of practical skills and knowledge in the fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum improvement and evaluation

Language Policy, Ideology and Educational Practices in a Globalised World

Delombera Negga, Monika Szirmai, Daniel Chan, 2017 The challenges posed by globalization for languages policies and education form the basis of this collection of selected doubly blind peer reviewed articles which have been put together following the 2014 PLIDAM conference on Policies and Ideologies in Language Teaching Actors and discourses The chapters collected in this volume revolve around the topic of globalization which we understand to be a blend of ideas covered by at least four meanings 1 internationalization in reference to the growing interdependence and transactions between countries 2 liberalization which has to do with the forming of an open and borderless world economy 3 universalization of certain phenomena around the world and 4 westernization with an emphasis on the influence of Western values gender equality freedom of speech and other ideas inspired by the West over the rest of the world The four broad themes that the chapters are organised into are I Policies in Language Teaching and Learning II Language Policy Ideology and Minority Languages III Language Teaching and Learning across Cultures IV Language Teaching and Learning with Technology Contributing to the knowledge discussion and debate about the impact that globalization has had on languages policies and education in a wide variety of contexts we hope that this book will be useful and informative to language researchers policy makers and anyone with an interest in the intersecting field between languages policies and education *U.S. Direct Investment Abroad*, 2008
