From Class To Race Essays In White Marxism And:

From Class to Race Charles Wade Mills, 2003 In *From Class to Race* Charles Mills maps the theoretical route that brought him to the innovative conceptual framework outlined in his academic bestseller *The Racial Contract* 1997 Mills argues for a new critical theory that develops the insights of the black radical political tradition While challenging conventional interpretations of key Marxist concepts and claims the author contends that Marxism has been white insofar as it has failed to recognize the centrality of race and white supremacy to the making of the modern world By appealing to both mainstream liberal values and the structuralism traditionally associated with the left Mills asserts that critical race theory can radicalize the mainstream Enlightenment and develop a new kind of contractarianism that deals frontally with race and other forms of social oppression rather than evading them **Beyond Bergson** Andrea J. Pitts, Mark William

Westmoreland, 2019-05-01 Examines Bergson's work from the perspectives of critical philosophy of race and decolonial theory placing it in conversation with theorists from Africa the African Diaspora and Latin America Building upon recent interest in Henri Bergson's social and political philosophy this volume offers a series of fresh and novel perspectives on Bergson's writings through the lenses of critical philosophy of race and decolonial theory Contributors place Bergson's work in conversation with theorists from Africa the African Diaspora and Latin America to examine Bergson's influence on literature science studies aesthetics metaphysics and social and political philosophy within these geopolitical contexts The volume pays particular attention to both theoretical and practical forms of critical resistance work including historical analyses of anti racist anti imperialist and anti capitalist movements that have engaged with Bergson's writings for example the N gritude movement the Indigenismo movement and the Peruvian Socialist Party These historical and theoretical intersections provide a timely and innovative contribution to the existing scholarship on Bergson and demonstrate the importance of his thought for contemporary social and political issues This is an exceptionally strong volume that excites and inspires the philosophical imagination it shows the centrality of questions of race and gender to philosophical inquiry and appropriation Keith Ansell Pearson author of *Bergson Thinking Beyond the Human Condition* [Race, Ethnicity and Social Theory](#) John Solomos, 2022-07-01 *Race Ethnicity and Social Theory* provides a critical analysis of the main areas of scholarly research and debate about racial and ethnic relations over the past few decades The book covers substantive areas of scholarly debate in this fast changing field including race and social relations identities and the construction of the racial other feminism and race the relationship between race and nationalism antisemitism the evolution of new forms of racism race and political representation and more generally the changing debates about race and ethnicity in our global environment The book argues that there is a need for more dialogue across national and conceptual boundaries about how to develop the theoretical tools needed to understand both the historical roots of contemporary forms of racialised social and political relations and the contemporary forms through which race is made and re made A key argument that runs through

the book is the need to develop conceptual frameworks that can help us to make sense of the changing forms of racial and ethnic relations in contemporary societies This means developing more dialogue across national research cultures as well as empirical research that seeks to engage with the key issues raised by contemporary theoretical debates The book will be of interest to both students wanting to develop a deeper understanding of this area of scholarship and to researchers of race ethnicity and migration working in various national and disciplinary environments Race and the Foundations of Knowledge Joseph A. Young, Jana Evans Braziel, 2006 This anthology demonstrates the longstanding multifarious and major role that race has played in the formation of knowledge The authors demonstrate how race theory intersects with other bodies of knowledge by examining discursive records such as travelogues literature and historiography theoretical structures such as common sense pseudoscientific racism and Eurocentrism social structures of class advancement and identity and politico economic structures of capitalism colonialism and law *Neoliberalism and Race* Lars Cornelissen, 2025-10-14 Lars Cornelissen argues that the category of race constitutes an organizing principle of neoliberal ideology Using the methods of intellectual history and drawing on insights from critical race studies Cornelissen explores the various racial constructs that structure neoliberal ideology some of which are explicit while others are more coded Beginning in the interwar period and running through to recent developments *Neoliberalism and Race* shows that racial themes have always pervaded neoliberal thinking The book's key argument is that neoliberal thought is constitutively racialized its racial motifs cannot be extracted from neoliberalism without rendering it theoretically and politically incoherent The book aptly explores a wide variety of racial constructs through the structure of neoliberal ideology deconstructing the conceptualizations in the works of landmark thinkers such as Ludwig von Mises Friedrich Hayek Peter Bauer Thomas Sowell Charles Murray and others from the early twentieth century to the present In this original perhaps controversial critique Cornelissen asserts that neoliberal thinkers were not just the passive recipients of racial discourse but also directly impacted it *Where Do We Go from Here?* Mark Major, 2010-01-01 Progressive politics has long been in crisis in the United States As the radical Left realizes the dire consequences of defining themselves solely by what they are against this collection challenges leading engaged academics and activists to show how radical politics can lead to a more fruitful democracy Dealing with pressing issues of the day such as health care race immigration religion foreign policy unions feminism liberalism education and the media this edited volume looks at the prospects for a progressive turn in U S politics In doing so it hopes to inspire the radical imagination by showing where we can go from here As technology continues to enable greater access to ideas around the world the power of intellectuals is greater than ever And given that the world is full of crushing poverty sexism uneven development environmental degeneration religious fanaticism racism and imperialism the need for intellectuals to inspire the radical imagination by championing principles of economic and social justice democracy and universality is also greater than ever However political visions are required to guide that struggle This is the aim of this book Du Bois's Dialectics Reiland

Rabaka,2009-07-15 Du Bois's Dialectics is doubly distinguished from other books on Du Bois because it is the first extended exploration of Du Bois's contributions to new critical theory and the first book length treatment of his contributions to contemporary black radical politics and the developing discipline of Africana Studies With chapters that undertake ideological critiques of education religion the politics of reparations and the problematics of black radical politics in contemporary culture and society Du Bois's Dialectics employs Du Bois as its critical theoretical point of departure and demonstrates his and Africana Studies contributions to as well as contemporary critical theory's connections to critical pedagogy sociology of religion and reparations theory Rabaka offers the first critical theoretical treatment of the W E B Du Bois Booker T Washington debate which lucidly highlights Du Bois's transition from a bourgeois black liberal to a black radical and revolutionary democratic socialist This book is primarily directed at scholars advanced undergraduate and graduate students working in and associated with Africana Studies American Studies Ethnic Studies and Cultural Studies

Routledge International Handbook of Contemporary Racisms John Solomos,2020-02-25 The study of contemporary forms of racism has expanded greatly over the past four decades Although it has been a focus for scholarship and research for the past three centuries it is perhaps over this more recent period that we have seen important transformations in the analytical frames and methods to explore the changing patterns of contemporary racisms The Routledge International Handbook of Contemporary Racisms brings together thirty four original chapters from international experts that address key features of contemporary racisms The Handbook has a truly global orientation and covers contemporary racisms in both the western and non western geopolitical environments In terms of structure the volume is organized into ten interlinked parts that include Theories and Histories Contemporary Racisms in Global Perspective Racism and the State Racist Movements and Ideologies Anti Racisms Racism and Nationalism Intersections of Race and Gender Racism Culture and Religion Methods of Studying Contemporary Racisms and the End of Racism These parts contain chapters that draw on original theoretical and empirical research to address the evolution and changing forms of contemporary racism The Handbook is framed by a General Introduction and by short introductions to each part that provide an overview of key themes and concerns Written in a clear and direct style and from a conceptual multidisciplinary and international perspective the Handbook will provide students scholars and practitioners with an overview of the most pressing issues of Racisms in our time *The Philosophy of Charles W. Mills* Mark William Westmoreland,2024-11-29 Charles W Mills 1951 2021 was considered by many to be the most well known philosopher specializing in political philosophy and critical philosophy of race This is the first collection of essays to critically examine the key themes of Mills's philosophy across his major works The chapters in this volume engage with major themes such as the racial contract non ideal theory metaphysics of race epistemology of ignorance and corrective justice They also explore Mills's engagement with philosophical figures including Frederick Douglass W E B Du Bois Maria Lugones Immanuel Kant Karl Marx and John Rawls Furthermore the contributors seek to uncover unexplored terrain which

may be illuminated by applying many of Mills's key insights. The Philosophy of Charles W. Mills will be of interest to scholars and advanced students working in political philosophy, philosophy of race, Africana philosophy, and Black political thought.

The Color of Our Shame Christopher J. Lebron, 2013-10-03. The Color of Our Shame argues that political thought must supply the arguments necessary to address the moral problems that attend racial inequality and make those problems salient to a democratic polity.
