Burch, 2012-02-26 A groundbreaking exploration of how race in America is being redefined The American racial order the beliefs institutions and practices that organize relationships among the nation s races and ethnicities is undergoing its greatest transformation since the 1960s Creating a New Racial Order takes a groundbreaking look at the reasons behind this dramatic change and considers how different groups of Americans are being affected Through revealing narrative and striking research the authors show that the personal and political choices of Americans will be critical to how and how much racial hierarchy is redefined in decades to come The authors outline the components that make up a racial order and examine the specific mechanisms influencing group dynamics in the United States immigration multiracialism genomic science and generational change Cumulatively

these mechanisms increase heterogeneity within each racial or ethnic group and decrease the distance separating groups from each other The authors show that individuals are moving across group boundaries that genomic science is challenging the whole concept of race and that economic variation within groups is increasing Above all young adults understand and practice race differently from their elders their formative memories are 9 11 Hurricane Katrina and Obama s election not civil rights marches riots or the early stages of immigration Blockages could stymie or distort these changes however so the authors point to essential policy and political choices Portraying a vision not of a postracial America but of a different racial America Creating a New Racial Order examines how the structures of race and ethnicity are altering a nation **Shaking**
