Grade 11 2013 Life Orientation Exam:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

The Oxford Handbook of Hope Matthew W. Gallagher, Shane J. Lopez, 2018
Hope has long been a topic of interest for psychologists, philosophers, educators, and physicians. In the past few decades, researchers from various disciplines and from around the world have studied how hope relates to superior academic performance, improved outcomes in the workplace, and improved psychological and physical health in individuals of all ages. Edited by Matthew W. Gallagher and the late Shane J. Lopez, *The Oxford Handbook of Hope* provides readers with a thorough and comprehensive update on the past 25 years of hope research while simultaneously providing an outline of what leading hope researchers believe the future of this line of research to be. In this extraordinary volume, Gallagher, Lopez, and their expert team of contributors discuss such topics as how best to define hope, how hope is distinguished from related philosophical and psychological constructs, what the current best practices are for measuring and quantifying hope, interventions and strategies for promoting hope across a variety of settings, the impact it has on physical and mental health, and the ways in which hope promotes positive functioning. Throughout its pages, these experts review what is currently known about hope and identify the topics and questions that will help guide the next decade of research ahead.

A Cross-Cultural Consideration of Teacher Leaders' Narratives of Power, Agency and School Culture Eleanor J. Blair, Carmel Roofe, Susan Timmins, 2019-12-23
A 2021 SPE Outstanding Book Award Winner. Studies of teacher leadership have proliferated over the past fifty years. Earlier work tended to focus exclusively on the link between teacher leadership and school improvement. Now, however, cross-cultural research on the relationship between teacher leadership and power, agency, and school culture has the potential to contribute to a deeper understanding of the teaching profession in diverse geographical and social contexts. *A Cross-Cultural Consideration of Teacher Leaders' Narratives of Power, Agency and School Culture* presents groundbreaking work that expands discussions of teachers' work to highlight the struggles of a profession in three different countries: England, Jamaica, and the United States. This research provides examples of teacher leaders' narratives about power, agency, and school culture, presenting the voices of teacher leaders across diverse contexts. It

identifies the lessons that transcend culture and speaks to the importance of understanding how teachers work and teacher leadership functions within complex school cultures This work has profound implications for teaching learning and leading in a 21st century global economy Perfect for courses such as Teacher Leadership Educational Leadership and Management Teaching and Teaching Methods Action Research Applied Research **The Condition of Education 2013** Susan Aud,Sidney Wilkinson-Flicker,2013-11-18 NOTE NO FURTHER DISCOUNT FOR THIS PRODUCT TITLE OVERSTOCK SALE Significantly reduced list price The Condition of Education 2013 summarizes important developments and trends in education using the latest available data The report presents indicators on the status and condition of education The indicators represent a consensus of professional judgment on the most significant national measures of the condition and progress of education for which accurate data are available To help inform policymakers and the public about the progress of education in the United States Congress has mandated that the National Center for Education Statistics NCES produce an annual report The Condition of Education This year s report presents 42 indicators of important developments and trends in U S education These indicators focus on population characteristics participation in education elementary and secondary education and postsecondary education Condition shows in 2012 about 90 percent of young adults ages 25 to 29 had a high school diploma or its equivalent and 33 percent had a bachelor s degree or higher As in previous years annual median earnings in 2011 were higher for those with higher levels of education for example 25 to 34 year olds with a college degree earned over twice as much as high school dropouts The Condition of Education 2013 includes the latest data available on these and more key indicators As new data are released the indicators will be updated and made available Along with these indicators NCES produces a wide range of reports and data to help inform policymakers and the American public about trends and conditions in U S education As this year s In 2011 almost two thirds of 3 to 5 year olds were enrolled in preschool and nearly 60 percent of these children were in full day programs At the elementary and secondary level there were about 50 million public school students in 2011 a number that is expected to grow to 53 million in the next decade Of these students nearly 2 million attended charter schools Postsecondary enrollment in 2011 was at 21 million students including 18 million undergraduate and 3 million graduate students NCES s newest data on elementary and secondary schools show that about one in five public schools was considered high poverty in 2011 meaning that 75 percent or more of their enrolled students qualified for free or reduced price lunch up from about one in eight in 2000 In school year 2009 10 some 3.1 million public high school students or 78.2 percent graduated on time with a regular diploma And in 2011 about 68 percent of recent high school completers were enrolled in college the following fall Meanwhile the status dropout rate or the percentage of 16 to 24 year olds who are not enrolled in school and do not have a high school diploma or its equivalent declined from 12 percent in 1990 to 7 percent in 2011 At 4 year colleges in 2011 nearly 90 percent of full time students at public and private nonprofit institutions were under the age of 25 However only about 29 percent of full time students at private for profit colleges were
