## **Highest Ranking Journals Impact Factor:**

Multidimensional Journal Evaluation Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals. The most important indicator to determine the influence of a journal is the Impact Factor. Since this factor only measures the average number of citations per article in a certain time window, it can be argued that it does not reflect the actual value of a periodical. This book defines five dimensions which build a framework for a multidimensional method of journal evaluation. The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011.

**Journals of the Century** Tony Stankus, 2019-12-06 This book first published in 2002 gathers some of America's top subject expert librarians to determine the most influential journals in their respective fields. 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide. Their choices reflect the history of each discipline or profession, taking into account rivalries between universities, professional societies for profit and not for profit publishers, and even nation states and international ideologies in each journal's quest for reputational dominance. Each journal was judged using criteria such as longevity of publication, foresight in carving out its niche, ability to attract none are in the employ of any publisher, but each is fully credentialed and well published, and many are award winners. The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele.

**How to Get Published in the Best Tourism Journals** Chris Cooper, C. M. Hall, 2024-04-12 Drawing on a wealth of knowledge and experience from leading tourism academics and journal editors, this practical *How To* guide offers clear, sighted advice on how to craft a high quality paper in terms of contribution, positioning, and submission. Accessible and comprehensive, it demystifies the process of getting published in the top tourism journals.

*Demystifying Scholarly Metrics* Marc W. Vinyard, Jaimie Beth Colvin, 2022-02-25 *Demystifying Scholarly Metrics* gives librarians and faculty the confidence to navigate the maze of scholarly metrics, identify quality journals in which to publish, and measure the impact of scholarly works. Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics. This user-friendly book demystifies them, helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions. It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact. Several controversies exist in the scholarly metrics landscape, including a disagreement between the proponents of altmetrics and traditional bibliometrics. Even more contentious debates are breaking out over predatory journals and open access publishing. Authors Mark Vinyard and Jaimie Beth Colvin, who successfully launched a faculty publishing initiative, explain which aspects of metrics are truly essential to grasp and they place these numbers in context. They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape.

Annual Review

of Comparative and International Education 2018 Alexander W. Wiseman, 2019-09-27 This year's edition brings together research and essays on comparative education trends and directions written by professional and scholarly leaders in the field. *The Death of a Scientist* Alexander Vapirev, 2018-09-24 A contemporary and detailed look at the reality behind the PhD degrees and postdoctoral fellowships in academia. The book explores some of the most pressing issues and unique challenges currently facing the doctoral and postdoctoral programs both on a local institutional level and on a global one where multiple complex factors influencing and governing the academic environment take place. The interrelated nature of these challenges together with discussions over certain historical trends and demographics offer a unique perspective on some often overlooked topics such as academic advisors and mentoring, increasing job insecurity, career prospects, mental issues, discrimination, and women in science, ever growing need for funding, increasing pressure for high profile research, internationalization of science, trends in university management, higher education dynamics, and government policies backed with references to published research, national and international surveys, and census data. Today most of the PhD programs have been accommodated to the benefit of the university with disregard to any sustainable demand and supply, job market strategies contrary to the original ideas behind their inception. The result is an overflooded job market and huge underemployment rates among doctorate holders. Infused with a narrative of a rich mix of personal experiences, observations, and impressions, all dressed in humor, mostly dark sarcasm, irony, disbelief, and often outright criticism, this text does not shy away from asking uncomfortable questions and even attempts to provide answers to some of them. At the same time, it also offers practical advice for those considering and those who already have dared to tread the PhD path.
