recognizing the unique characteristics of Web systems and what these characteristics imply in terms of the approaches we take to Web systems development and deployment in practice. A scan of the publications in related conference proceedings and journals highlights the diversity of the discipline areas which contribute to both the richness and the complexity of Web Engineering. The 5th International Conference on Web Engineering ICWE2005 held in Sydney Australia extends the traditions established by the earlier conferences in the series ICWE2004 in Munich Germany ICWE2003 in Oviedo Spain ICWE2002 in Santa Fe Argentina and ICWE2001 in Cáceres Spain. Not only have these conferences helped disseminate cutting edge research within the field of Web Engineering but they have also helped define and shape the discipline itself. The program we have put together for ICWE2005 continues this evolution. Indeed we can now begin to see the maturing of the field. For possibly the first time there was very little debate within the Program Committee about which papers were in and out of scope and much more debate as to the each papers contributions to the field.

True to Life Pre-intermediate Teacher's Book
Ruth Gairns, Stuart Redman, 1995-06-29 True to Life is a five level course designed specifically for adult learners *English for Specific Purpose* Erizar, Natural disaster learning can be integrated not only in science class but also in language class. In this book the writer proposed the disaster education to be taught in English class at university level. The reason is that the students will gain two skills through this book namely English skill and dealing with disaster skill. Through this book students are expected to integrate their understanding on natural disasters with English environment. As the result it is expected that a good teaching learning atmosphere can be created not only by the teachers but also by the students who will be actively involved in the learning process.
