iCEER2014-McMaster Digest Mohamed Bakr,Ahmed Elsharabasy,2014-11-18 International Conference on Engineering Education and Research Social Studies Education in South and South East Asian Contexts Kerry J Kennedy,2021-07-22

The education of young people is context bound This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education There is not a single context across this broad geographical expanse rather different religions different political systems and different values exert influences that create distinctive programmes that characterise different countries Yet there are also commonalities such as the post colonial nature of most of the countries portrayed in this book determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities There are also voices of resistance in these chapters recognising the realities of local contexts but also recognising the need for change Social studies education in these contexts may well be descended from its origins in North America but in South and South Asian contexts it has taken on new purposes new forms and new values Education researchers policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them Teaching and Learning STEM Richard M. Felder,Rebecca Brent,2016-02-22 Rethink traditional teaching methods to improve student learning and retention in STEM Educational research has repeatedly shown that compared to traditional teacher centered instruction certain learner centered methods lead to improved learning outcomes greater development of critical high level skills and increased retention in science technology engineering and mathematics STEM disciplines Teaching and Learning STEM presents a trove of practical research based strategies for designing and teaching STEM courses at the university community college and high school levels The book draws on the authors extensive backgrounds and decades of experience in STEM education and faculty development Its engaging and well illustrated descriptions will equip you to implement the strategies in your courses and to deal effectively with problems including student resistance that might occur in the implementation The book will help you Plan and conduct class sessions in which students are actively engaged no matter how large the class is Make good use of technology in face to face online and hybrid courses and flipped classrooms Assess how well students are acquiring the knowledge skills and conceptual understanding the course is designed to teach Help students develop expert problem solving skills and skills in communication creative thinking critical thinking high performance teamwork and self directed learning Meet the learning needs of STEM students with a broad diversity of attributes and backgrounds The strategies presented in Teaching and Learning STEM don t require revolutionary time intensive changes in your teaching but rather a gradual integration of traditional and new methods The result will be continual improvement in your teaching and your students learning More information about Teaching and Learning STEM can be found at <http://educationdesignsinc.com> book including its preface foreword table of contents first chapter a reading guide and reviews in 10 prominent STEM
