the program and the outputs to be produced by the program iii Describe the algorithm that you intend to implement in the program This step involves top down design and stepwise decomposition using pseudocode or flow charts iv Turn the algorithm into MATLAB statements v Test the MATLAB program This step includes unit testing of specific functions as well as exhaustive testing of the final program with many different data sets 2 Emphasis on Functions The book emphasizes the use of functions to logically decompose tasks into smaller sub tasks It teaches the advantages of functions for data hiding It also emphasizes the importance of unit testing functions before they are combined into the final program In addition the book teaches about the common mistakes made with functions and how to avoid them 3 Emphasis on MATLAB Tools The book teaches the proper use of MATLAB s built in tools to make programming and debugging easier The tools covered include the Editor Debugger the Workspace Browser the Help Browser and GUI design tools **The Science of Trust** John M. Gottman,2011-04-11 An eminent therapist explains what makes couples compatible and how to sustain a happy marriage For the past thirty five years John Gottman s research has been internationally recognized for its unprecedented ability to precisely measure interactive processes in couples and to predict the long term success or failure of relationships In this groundbreaking book he presents a new approach to understanding and changing couples a fundamental social skill called emotional attunement which describes a couple s ability to fully process and move on from negative emotional events ultimately creating a stronger relationship Gottman draws from this longitudinal research and theory to show how emotional attunement can downregulate negative affect help couples focus on positive traits and memories and even help prevent domestic violence He offers a detailed intervention devised to cultivate attunement thereby helping couples connect respect and show affection Emotional attunement is extended to tackle the subjects of flooding the story we tell ourselves about our relationship conflict personality changing relationships and gender Gottman also explains how to create emotional attunement when it is missing to lay a foundation that will carry the relationship through difficult times Gottman encourages couples to cultivate attunement through awareness tolerance understanding non defensive listening and empathy These qualities he argues inspire confidence in couples and the sense that despite the inevitable struggles the relationship is enduring and resilient This book an essential follow up to his 1999 The Marriage Clinic offers therapists students and researchers detailed intervention for working with couples and offers couples a roadmap to a stronger future together
