landscape of our time and the presidency from Reagan to George W Bush in a whole new light As the most influential economic statesman of his age Greenspan spent a lifetime grappling with a momentous shift the transformation of finance from the fixed and regulated system of the post war era to the free for all of the past quarter century The story of Greenspan is also the story of the making of modern finance for good and for ill Greenspan s life is a quintessential American success story raised by a single mother in the Jewish migr community of Washington Heights he was a math prodigy who found a niche as a stats crunching consultant A master at explaining the economic weather to captains of industry he translated that skill into advising Richard Nixon in his 1968 campaign This led to a perch on the White House Council of Economic Advisers and then to a dazzling array of business and government roles from which the path to the Fed was relatively clear A fire breathing libertarian and disciple of Ayn Rand in his youth who once called the Fed s creation a historic mistake Mallaby shows how Greenspan reinvented himself as a pragmatist once in power In his analysis and in his core mission of keeping inflation in check he was a maestro indeed and hailed as such At his retirement in 2006 he was lauded as the age s necessary man the veritable God in the machine the global economy s avatar His memoirs sold for record sums to publishers around the world But then came 2008 Mallaby s story lands with both feet on the great crash which did so much to damage Alan Greenspan s reputation Mallaby argues that the conventional wisdom is off base Greenspan wasn t a na ve ideologue who believed greater regulation was unnecessary He had pressed for greater regulation of some key areas of finance over the years and had gotten nowhere To argue that he didn t know the risks in irrational markets is to miss the point He knew more than almost anyone the question is why he didn t act and whether anyone else could or would have A close reading of Greenspan s life provides fascinating answers to these questions answers whose lessons we would do well to heed Because perhaps Mallaby s greatest lesson is that economic statesmanship like political statesmanship is the art of the possible The Man Who Knew is a searching reckoning with what exactly comprised the art and the possible in the career of Alan Greenspan

Secular War Stacey Gutkowski, 2013-11-27 How have long standing and unconscious secular assumptions

about religion shaped the post 9 11 climate and its wars Stacey Gutkowski explores this little examined yet crucial element of British perceptions of and policy towards Jihadism over the last decade to draw critical conclusions about the relationship between war and the secular She points to a surprisingly coherent body of secular beliefs that have fuelled policies in Iraq Afghanistan and counter terrorism and that have had mixed results responsible for both positive strategies and tragic errors The theory Gutkowski develops on the impact of this secular approach to warfare holds a broader global significance and cannot be viewed as just a British phenomenon This book addresses ongoing and critical debates such as the overreach of Western liberal interventionism in the Middle East and speaks to policy makers security analysts and students of IR Foreign Policy and Security Studies

School Choice and the Betrayal of Democracy Robert Asen, 2021-10-04 Evidence shows that the increasing privatization of K 12 education siphons resources away from public schools resulting in poorer learning conditions underpaid teachers and greater inequality But as Robert Asen reveals here the damage that market based education reform inflicts on society runs much deeper At their core these efforts are antidemocratic Arguing that democratic communities and public education need one another Asen examines the theory driving privatization popularized in the neoliberalism of Milton and Rose Friedman as well as the case for school choice promoted by former secretary of education Betsy DeVos and the controversial voucher program of former Wisconsin governor Scott Walker What Asen finds is that a market based approach holds not just a different view of distributing education but a different vision of society When the values of the market choice competition and self interest shape national education that policy produces individuals Asen contends with no connections to community and no obligations to one another The result is a society at odds with democracy Probing and thought provoking **School Choice and the Betrayal of Democracy** features interviews with local on the ground advocates for public education and offers a countering vision of democratic education one oriented toward civic relationships community and equality This book is essential reading for policymakers advocates of public education citizens and researchers
