Science Education in Canada Christine D. Tippett, Todd M. Milford, 2019-07-01 This book offers a meso
 level description of demographics science education and science teacher education Representing all 13 Canadian
 jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and
 function as a common starting point from which to identify causal relationships that may be associated with Canada's
 successes The book highlights commonalities consistencies and distinctions across the provinces and territories in a thematic
 analysis of the 13 jurisdiction specific chapters Although the analysis indicates a network of policy and practice issues
 warranting further consideration the diverse nature of Canadian science education makes simple identification of causal
 relationships elusive Canada has a reputation for strong science achievement However there is currently limited literature on
 science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher
 education This book fills that gap by presenting a thorough description of science education at the provincial territorial level
 as well as a more holistic description of pressing issues for Canadian science education
