Reflective Practice as Professional Development Atsuko Watanabe, 2016-12-07 This book presents a researcher's work on reflective practice with a group of high school teachers of English in Japan. Beginning with a series of uncomfortable teacher training sessions delivered to unwilling participants, the book charts the author's development of new methods of engaging her participants and making use of their own experiences and knowledge. Both an in-depth examination of reflective practice in the context of Japanese cultural conventions and a narrative account of the researcher's reflexivity in her engagement with the study, the book introduces the concept of the reflective continuum, a non-linear journey that mirrors the way reflection develops in unpredictable and individual ways.

better understand the possible traumatic backgrounds of their students and how that could be affecting their academic social and emotional lives It also focuses on how school personnel can create a safe environment in schools and classrooms to help students recognize nurture and expand the internal resilience that has enabled them to weather past situations and that will allow them to continue the healing process One chapter is devoted to the topic of self care for educators who are working so hard to help students be resilient An appendix features a list of recommended books on the topics of personal migration and resilience
