Miseducating Americans Distortions Of Historical Understanding:

Miseducating Americans Richard F. Hamilton, 2017-09-08 In *Miseducating Americans* Richard F. Hamilton examines accounts of American history appearing in textbooks and popular accounts and compares these with the reports contained in scholarly monographs. The task is to determine how certain myths and misconstructions became accepted as recorded history. Hamilton provides much needed correction of those misleading accounts. Was America historically the land of the free? Not if you take into account slavery, discrimination, and post-Civil War segregation policies. Was America in the late nineteenth century truly expansionist as American textbooks imply, or did it actually capitalize on unexpected political and economic opportunities like Russia's desire to rid itself of Alaska? Was the acquisition of the Philippines a zealous profit-seeking effort aiming for the China market, or the fortuitous consequences of a move against Spain during the Spanish-American War? *Miseducating Americans* debunks many commonly accepted explanations of historical facts. It contends that many accounts are oversimplifications and some are one-sided depictions of virtue. Hamilton traces the sources of these misconstructions, which mostly come from history textbooks written by authors aiming for popular audiences. He then offers explanations as to how and why the inaccuracies have been repeated and passed on.

History and Hope in American Literature Benjamin Railton, 2016-11-10 Throughout history, creative writers have often tackled topical subjects as a means to engage and influence public discourse. American authors, those born in the States and those who became naturalized citizens, have consistently found ways to be critical of the more painful pieces of the country's past yet have done so with the patriotic purpose of strengthening the nation's community and future. In *History and Hope in American Literature: Models of Critical Patriotism*, Ben Railton argues that it is only through an in-depth engagement with history, especially its darkest and most agonizing elements, that one can come to a genuine form of patriotism that employs constructive criticism as a tool for civic engagement. The author argues that it is through such critical patriotism that one can imagine and move toward a hopeful shared future for all Americans. Railton highlights twelve works of American literature that focus on troubling periods in American history, including John Steinbeck's *The Grapes of Wrath*, David Bradley's *The Chaneysville Incident*, Louise Erdrich's *Love Medicine*, Tony Kushner's *Angels in America*, Junot Díaz's *The Brief Wondrous Life of Oscar Wao*, and Dave Eggers's *What Is the What*. From African and Native American histories to the Depression and the AIDS epidemic, Caribbean and Rwandan refugees and immigrants to global climate change, these works help readers confront, understand, and transcend the most sorrowful histories and issues. In so doing, the authors of these books offer hard-won hope that can help point people in the direction of a more perfect union. *History and Hope in American Literature* will be of interest to students and practitioners of American literature and history.

Race and the American Story Stephanie Shonekan, Adam Seagrave, 2024 I didn't know I was Black until I came to the United States. The journey to my personal understanding of Blackness has been long and rife with pain and passion, excitement and exasperation. The fact that the facets of my identity seem to stretch across

the Diaspora Equatorial Guinea Nigeria Trinidad and Tobago and the United States means that this journey has not been straightforward It has been treacherous with many frustrating moments when I was not sure how much lower my self esteem could go But it has also been exceedingly rewarding as I stumbled upon new paths to convert each disappointment into an opportunity to grow and become more confident in who I was Sometimes that has meant becoming overzealous in my own self affirmation the tone of my voice taking on a sharper edge as I explained to others why pride in Blackness was a requisite characteristic of any kind of Black progress But I justify that stridence by thinking of the dearth of encouragement from sources that are not bothered by the profundity of Blackness including the educational system popular culture and mainstream media The bitterness that comes with the construction of race as a state of being and the making of racism as a behavior and attitude can be tasted potently in the New World It takes a fundamental encounter with whiteness for one to truly appreciate the meaning of Blackness However a picture of tribalism and ethnic tensions is vividly displayed in the midst of Blackness in the heart of Africa So my story has been a two pronged journey through tribalism and racism **The**

Patchwork of World History in Texas High Schools Stephen Jackson,2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States **Miseducation** A. J. Angulo,2016-04 By investigating how laws myths national aspirations and global relations

have recast and at times distorted the key purposes of education this pathbreaking book sheds light on the role of ignorance in shaping ideas public opinion and policy Robert N Proctor author of Golden Holocaust Origins of the Cigarette Catastrophe and the Case for Abolition Historical Studies in Education Revue d histoire de l ducation **The Miseducation of the West** Joe Kincheloe, Shirley R. Steinberg,2004-06-30 The Miseducation of the West examines the ways in which educational institutions such as media and schools have shaped Western views of Islam The nature of these messages tells readers as

much if not more about Western self images as they do about Islam and Islamic peoples Quickly emerging is a Western perspective on the other Westerners found easy justification for the colonial conquest of many Islamic lands In the 18th 19th and early 20th centuries England France and to a lesser extent Russia colonized much of the Muslim world with the United States entering the picture after World War II Economic colonialization the oil business interference with various governments and the way these events and people are represented in the formal curriculum of schools and the informal curriculum of the media are central dimensions of this work The contemporary expression of these stories involve the Bush administration s and its conservative allies efforts to teach the nation about the true meaning of 9 11 and Islamic terrorism In various reports conservative organizations with close ties to the Bush White House present forceful views of what historical concepts should be taught in U S schools As Joe L Kincheloe states in his thoughtful introduction these efforts represent a return to a 1954 view of America as the bearer of the democratic torch to the anti democratic forces of the world A critical education must counter such tendencies and work to conceptualize 9 11 in a variety of contexts The essayists in this book write with different voices from diverse viewpoints contributing to a discussion that will not end for years to come The State of the American Mind: Stupor and Pathetic Docility Amechi Okolo PhD, 2010-06-10 This book The State of the American Mind Stupor and Pathetic Docility Volume One begins to unravel some of the most obvious perplexing embarrassing and enduring problems and contradictions of American history and sociology viz how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement etc Further how could men of such great wisdom and intellect like George Washington James Madison Thomas Jefferson and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil because they had variously experienced white servitude and slavery themselves collude to establish and institutionalize the horrible system of Negro chattel slavery in America and also disenfranchised over 90 percent of people of their own race actions that racism could not explain The structural institutional slavery system they established and the resultant consequent racism hobbles America today as it did in the past and forced Eric Holder the Attorney General to declare that America is a nation of cowards when it comes to race discussions Thus this book starts with serious critical discussions of race in America and reveals what no textbook has ever done viz that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains Further the book also shows the year Black slavery started something almost all textbooks got wrong It also shows who was the first Black slave in America something no textbook ever mentions It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward This book therefore shatters the two dominant themes of Americas history and sociology that

Blacks were brought into America in chains as slaves while whites came to America in search of freedom as Obama famously told us in his race speech Thus the crowning lesson of this book in addition to discussing some critical policy issues like education health care etc is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry their universal history and experience of servitude bond indentures and slavery Nothing is more universal more common and more shared in American history and sociology than the fact that most of our ancestors black and white were servants bond indentures and slaves who were dominated and super exploited by few overlords Colonial America was the preferred dumping ground for British outcasts rejects criminals masterless class vagabonds bond indentures slaves etc until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens Thus that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good powerful achieving citizens do not normally emigrate to new uncharted lands

African American Females Eboni M. Zamani-Gallaher, Vernon C. Polite, 2013-07-01

African American Females Addressing Challenges and Nurturing the Future illustrates that across education health and other areas of social life opportunities are stratified along gender as well as race lines The unequal distribution of wealth power and privilege between men and women intersects with race and class to create multiple levels of disadvantage This book is one result of a unique forum intended to bring into focus the K 12 and postsecondary schooling issues and challenges affecting African American girls and women Focusing on the historical antecedents of African American female participation and the contemporary context of access and opportunity for black girls and women the contributors to this collection pay particular attention to the interaction of gender with race ethnicity class age and health with the central aim of encouraging thoughtful reading critical thinking and informed conversations about the necessity of exploring the lives of African American females Additionally the book frames important implications for recommended changes in policy and practice regarding a number of critical matters presently affecting African American females in schools and communities across the state of Michigan and nationwide

White Awareness Judy H. Katz, 1978 Stage 1

Towards the De-Miseducation of the African-American Dwight Mosley, 2022-02-03

DE MISEDUCATION is the culmination of eight years of research that sought to focus on objectivity while balancing breadth and conciseness Its focus is on black America as a people and as a part of greater America It begins with the Black Golden Age just after the start of WWII and explores the civil rights movement from several optics the black militancy era the decline of the black family cocaine America crack and incarceration nation with reference made to the CIA and the DEA the schism between the black male and female the Tuskegee Airmen the ladies of NASA and Hidden Figures the destruction of the black family the great exodus of blacks out of the ghetto the plight of

fatherless boys and much much more The work ends with proposals and prognostications for the future of blacks in America There is a very strong analysis of the 1960 s especially 1968 America s most volatile year ever Those having come of age in the 60 s will have many a remembrance those who were socially active in the 60 s will have never to be forgotten memories

Race and Ideology Arthur Kean Spears,1999 Race and Ideology proposes an understanding of racism as a divide and conquer mechanism Race and Ideology reveals how various strands of racial thinking and behavior are crucial for maintaining the unequal distribution of wealth that is more pronounced in the U S than in any other advanced industrial country Though primarily concerned with the U S this collection contains chapters on other societies in order to highlight commonalties and the global nature of the race color problem This book proposes a new understanding of racism by examining a variety of issues that show how racism and colorism along with other forms of oppression are interconnected and maintained by language symbolism and popular culture It includes such topics as how blackness is the symbolic bottom of the U S social structure how the teaching of language and culture can be a tool for understanding inequality and how the media contribute to the dissemination of stereotypes of people of color Race and Ideology offers provocative ideas that must be confronted if we are to construct an understanding of racism that can be useful for social change

Shades of Black William Cross,1991-12-18 In this controversial and path breaking book William E Cross Jr presents the diversity and texture that have always been the hallmark of Black psychology Shades of Black explodes the myth that self hatred is the dominant theme in Black identity With a thorough review of social scientific literature on Negro identity conducted between 1936 and 1967 Cross demonstrates that important themes of mental health and adaptive strength have been frequently overlooked by scholars both Black and White obsessed with proving Black pathology He examines the Black Power Movement and critics who credit this era with a comprehensive change in Black self esteem Allowing for a considerable gain in group identity among Black people during this period Cross shows how before this working and middle class and even many poor Black families were able to offer their progeny a legacy of mental health and personal strength that sustained them in their struggles for political and cultural consensus Author note William E Cross Jr is a psychologist and Associate Professor in the Africana Studies and Research Center of Cornell University

Knowledge and Critical Pedagogy Joe L. Kincheloe,2008-06-19 In a globalized neo colonial world an insidious and often debilitating crisis of knowledge not only continues to undermine the quality of research produced by scholars but to also perpetuate a neo colonial and oppressive socio cultural political economic and educational system The lack of attention such issues receive in pedagogical institutions around the world undermines the value of education and its role as a force of social justice In this context these knowledge issues become a central concern of critical pedagogy As a mode of education that is dedicated to a rigorous form of knowledge work teachers and students as knowledge producers anti oppressive educational and social practices and diverse

Wright,2002-02-28 This study contends that historians and intellectuals failed to understand the difference between race and ethnicity which has in turn impaired their ability to understand who Black people are in America The author argues that Black Americans are to be distinguished from other categories of black people in the country black Africans West Indians or Hispanics While Black people are members of the black race as are other groups of people they are a distinct ethnic group of that race This conceptual failure has hampered the ability of historians to define Black experience in America and to study it in the most accurate authentic and realistic manner possible This confusing situation is aggravated further by the fact that many scholars tend to describe Black people in an arbitrary manner as Africans African Americans Afro Americans black or Black which is insufficient for precision They sometimes downplay the historical evidence regarding African identity and the identity of Blacks in America Wright offers a new methodological basis for undertaking Black history namely the framework of historical sociology He argues that this approach will produce a more useful history for Black people and others in America **International Studies in the Philippines** Frances Antoinette Cruz,Nassef Manabilang Adiong,2020-03-26 How can local experiences and the social transformation generated by modernity help to enrich our understanding of the international What might a version of the much discussed non Western International Relations IR look like What continuities and discontinuities from the Philippine experience in particular can be useful for understanding other post colonial polities The Philippines makes a fascinating case study of a medium sized developing post colonial multi ethnic and multi cultural state in Southeast Asia Cruz Adiong and their contributors map horizons of non Western approaches in
