Risk Management and Analysis: Measuring and modelling financial risk Carol Alexander,1998 The author editor has produced two stand alone or

companion volumes Only one third of the original material remains New Markets and Products begins with two chapters on emerging markets The book then goes on to cover markets and products of increasing complexity standard equity and interest rate derivatives exotic options swap and swaptions volatility trading and finally credit derivatives The contributors are all acknowledged experts in their fields Michael Howell Mark Fox Ian King Chris Rogers Andrew Street

Challenges at the Bank for International Settlements Elmar B. Koch,2007-10-20 For a number of reasons I am pleased that Elmar has asked me to write a foreword to this volume which assembles together a number of pieces that he wrote over the course of the decade between 1997 and 2007 The first reason is that it gives me the opportunity to thank him for the work he has carried out so conscientiously and ably in his role as an economist working for the BIS I would however be remiss if I did not also thank him for his earlier efforts contributing in particular to the statistical output of the MED and also the broader contribution he made as president of the Sports Club from 2004 to 2007 A second reason for being pleased is that the research contained in this volume was drawn from the period when I was chief of the MED and very much involved in discussions of the portant issues to which these papers are directed Time goes fast when one is busy and it is all too easy to forget what was yesterday s central ques on This volume constitutes a kind of reintroduction to old friends and that is always a pleasure The papers in this volume are grouped into four time periods during each of which Elmar had been given different responsibilities The in resting point is that taken together they imply an interest in essentially all the important topics of interest to the BIS
