The success of nearly all public and private sector policies hinges on the behavior of individuals groups and organizations
Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research
However policymakers often are unaware of behavioral science findings that may help them craft and execute more effective
and efficient policies The pages of this new journal will become a meeting ground a place where scientists and non scientists
can encounter clearly described behavioral research that can be put into action By design the scope of BSP is broad with
topics spanning health care financial decisionmaking energy and the environment education and culture justice and ethics
and work place practices Contributions will be made by researchers with expertise in psychology sociology law behavioral
economics organization science decision science and marketing The journal is a key offering of the Behavioral Science Policy
Association in partnership with the Brookings Institution The mission of BSPA is to foster dialog between social scientists
policymakers and other practitioners in order to promote the application of rigorous empirical behavioral science in ways
that serve the public interest BSPA does not advance a particular agenda or political perspective The first issue s contents
