

HISTORY PAPER 2

Guidelines for the assessment of 'A' level history essays

For an essay to be categorized as excellent (22-25 marks) or very good (19-21marks), it should be composed of (a)relevant ideas/arguments (b) supportive evidence or specific examples (c) specific periods/dates (d) convincing and clearly flowing ideas from the introduction, through the essay body, up to the conclusion & enough coverage of what is asked (f) readable work. The lower grades of essay i.e good (16-18marks) and fairly good (13-15) are due to the less specific examples and time frame, less average and less accuracy. Then the 'O' level type/generalized essays (10-12marks) are either those without examples and time frame or those with sketchy statements/points. The lowest categories of essays are the poor ones (06-09 marks) and the very poor ones (00-05marks) with largely irrelevant material.

While marking the candidates' work in relation to the above questions, the following notes can be used. It is also important to note that the essays should be marked in consideration of their overall soundness and clear candidates' lines of argument.

1. A) THE PRE COLONIAL KIKUYU SOCIETY

The kikuyu people are believed to have migrated from areas around Meru. By the 1st half of the 19th century, they had already reached the area around Metumu/Galo border. Their settlements gradually expanded as moreland was acquired from the neighbouring territories.

SOCIAL ORGANISATION

The social organisation of the kikuyu was mainly based on the clan, age group/age set. Most of the kikuyu belonged to nine clans, which were corresponding to the nine daughters of Gakuyu, their legendary founder. Each clan was composed of age groups or generation sets (Imariika), in turn these were divided into age sets and each set was given a particular name. Young men at the age of about 18 years were initiated into the age set and this even involved circumcision. The male initiation was based on a 'Muhingo', closed period, which lasted for nine 'imera' (seasons) or 'Miaka (years) during which no initiations of boys took place at all. The closed period was followed by annual initiations for the next nine years. These nine initiation sets formed one army contingent or regiment set. On the part of females, they were initiated annually and in some areas, they formed their own age sets with particular names.

Responding to the emerging needs of lifelong learners arguably represents one of the most fundamental challenges facing higher education systems of the countries of the developing world At the start of the new century the concept of Lifelong Learning may indeed be counted as one of the the key organising concepts underlying public policy in many countries The interpretation of the concept however remains highly contested This timely book throws new light on the dramatic changes taking place in higher education through an exploration of the participation of non traditional students in ten countries Among others the following areas are explored the complex reality behind the statistics on participation in higher education in five European countries Austria Germany Ireland Sweden and the United Kingdom North America Japan Australia and New Zealand contrasting perceptions of lifelong learning changing patterns of participation by adults in higher education national and institutional policies and innovations to accommodate non traditional students and new forms of study conclusions for policy practice and research Higher Education for Lifelong Learners will be of interest to academics researchers and students involved with higher education lifelong learning and comparative education as well as policy makers educational managers and administrators The contributions reveal a remarkable transformation in the student body and in the way learners pursue their studies highlighting the international impact of increasing marketisation and differentiation on the nature of the higher education accessible to potential lifelong learners

Combating Social Exclusion in University Adult Education Julia Preece, 2018-08-17 Published in 1999 this work suggests that widening participation is not just about changing learner expectations it is also about changing institutional expectations and practices Higher learning for example should include a broader more inclusive range of knowledge and ways of knowing than at present and criteria for learning achievement should include assessment of citizenship as well as linear outcomes
