The Indian National Bibliography ,2017-10 **Indian National Bibliography** B. S.

Kesavan,2017-12 **Love is Green: Compassion as responsibility in the ecological emergency** Lucy Weir,2020-01-31

This book links three themes non dualistic agency the good of systems and compassionate attunement and relates them to the ecological emergency The author begins by examining how we currently understand our ability to choose what we do our agency and conclude that this is dualistic we think of an action to do and then we physically act Yet an understanding that we are enmeshed in context means our capacity to act freely dissolves in the mesh We evolved capacities for consciousness and awareness capacities that allow us to realise that we are here now but that do not inevitably imply choice Our capacity for realisation gives us the ability to elicit an emotional response When we understand our enmeshment we can attune to a deep compassion for ourselves and indeed for all systems unfolding through time Compassionate attunement allows a different set of options for action to become available to us This then shifts how we respond to ourselves our human relationships and to the ecological emergency we are currently embroiled in This work is inspired by the great Kamakura Zen Master Eihei D gen The book s contribution is to extend and link the notion of practice realisation with the literature on evolutionary biology and entropy maximisation which allows us to speak of the good of systems Systems unfold as good for us when biodiversity maximisation occurs By considering the ecological emergency in light of compassionate attunement we open ourselves to a new array of possibilities for action Some of these the author outlines in the conclusion relating them to existing literature on compassionate achievement and compassionate communication to show how our this practice shifts our relationship to ourselves to one another and to the ecological emergency thus changing the course of human history

research on the connection of the Hydraulis to the roots of the more recent Industrial Revolution at the University of St Gallen in 1989 over 30 years ago I continue to identify additional support for it We do not know whether the beginnings of an Industrial Revolution in Hellenistic Greece would have continued if not cut off by the Roman Empire's conquests Neither do we know whether the more recent latent Industrial Revolution could have risen up again in the 17th century without Vitruvius or Hero of Alexandria's preserved writings The point of this book is to emphasize with new findings that had the Romans not stopped the growth of science and technology in the Hellenistic Period that it would have likely continued to develop into a full fledged Industrial Revolution Secondly the more recent Industrial Revolution borrowed heavily on the technology and science of the Hellenistic Period In the true sense of the Renaissance 17th century industrial progress largely picked up the written remnants of Antiquity to be able to continue on after a centuries long caesura
