Data Integration in the Life Sciences Marcos Da Silveira,Cédric Pruski,Reinhard Schneider,2017-11-03 This book constitutes the proceedings of the 12th International Conference on Data Integration in the Life Sciences DILS 2017 held in Luxembourg in November 2017 The 5 full papers and 5 short papers presented in this volume were carefully reviewed and selected from 16 submissions They cover topics such as life science data modelling analysing indexing and querying life sciences datasets annotating matching and sharing life sciences datasets privacy and provenance of life sciences datasets

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk,Kathleen M. Vogel,Amanda Jane Ozin,2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives **Geoethics** S. Peppoloni,G. Di Capua ,2015-08-24 This Special Publication will be an important tool for geoscientists aimed at increasing the awareness of their societal role and responsibility in conducting education research and practice activities What are the responsibilities of a geoscientist And what motivations are needed to push geoscientists to practice the Earth sciences in an ethical way The major environmental challenges affecting human communities require not only a strictly scientific and technical preparation by the geoscientists but also a reflection on their broader obligations towards society It is important that geoscientists consider geoethics as an indispensable framework on which to base their training and activity The principles of geoethics can guide them to pursue the common good by weighing the benefits and costs of each choice and identifying eco friendly and society friendly solutions that guarantee the respect of the right balance between human life and the dynamics of the Earth Communication and dissemination of geosciences should become core activities in building a knowledge based society which is able better to protect itself and the Earth ecosystems in order to guarantee a life in harmony with our planet for future generations Rendering Life Molecular Natasha Myers,2015-08-27 What are living bodies made of Protein modelers tell us that our cells are composed of millions of proteins intricately folded molecular structures on the scale of nanoparticles Proteins twist and wriggle as they carry out the activities that keep cells alive Figuring out how to make these unruly substances visible tangible and workable is a challenging task one that is not readily automated even by the fastest computers Natasha Myers explores what protein modelers must do to render three

dimensional atomic resolution models of these lively materials Rendering Life Molecular shows that protein models are not just informed by scientific data model building entangles a modeler's entire sensorium and modelers must learn to feel their way through the data in order to interpret molecular forms Myers takes us into protein modeling laboratories and classrooms tracking how gesture affect imagination and intuition shape practices of objectivity Asking What is life becoming in modelers hands she tunes into the ways they animate molecules through their moving bodies and other media In the process she amplifies an otherwise muted liveliness inflecting mechanistic accounts of the stuff of life

Genes, Brains, and Human Potential Ken Richardson, 2017-03-21 For countless generations people have been told that their potential as humans is limited and fundamentally unequal The social order they have been assured is arranged by powers beyond their control More recently the appeal has been to biology specifically the genes brain sciences the concept of intelligence and powerful new technologies Reinforced through the authority of science and a growing belief in bio determinism the ordering of the many for the benefit of a few has become more entrenched Yet scientists are now waking up to the influence of ideology on research and its interpretation In *Genes Brains and Human Potential* Ken Richardson illustrates how the ideology of human intelligence has infiltrated genetics brain sciences and psychology flourishing in the vagueness of basic concepts a shallow nature versus nurture debate and the overhyped claims of reductionists He shows how ideology more than pure science has come to dominate our institutions especially education encouraging fatalism about the development of human intelligence among individuals and societies *Genes Brains and Human Potential* goes much further building on work being done in molecular biology epigenetics dynamical systems evolution theory and complexity theory it maps a fresh understanding of intelligence and the development of human potential Concluding with an upbeat message for human possibilities this synthesis of diverse perspectives will engender new conversations among students researchers and other interested readers

Pharmaceutical Quality by Design Walkiria S. Schlindwein, Mark Gibson, 2018-01-05 A practical guide to Quality by Design for pharmaceutical product development *Pharmaceutical Quality by Design A Practical Approach* outlines a new and proven approach to pharmaceutical product development which is now being rolled out across the pharmaceutical industry internationally Written by experts in the field the text explores the QbD approach to product

development This innovative approach is based on the application of product and process understanding underpinned by a systematic methodology which can enable pharmaceutical companies to ensure that quality is built into the product Familiarity with Quality by Design is essential for scientists working in the pharmaceutical industry The authors take a practical approach and put the focus on the industrial aspects of the new QbD approach to pharmaceutical product development and manufacturing The text covers quality risk management tools and analysis applications of QbD to analytical methods regulatory aspects quality systems and knowledge management In addition the book explores the development and manufacture of drug substance and product design of experiments the role of excipients multivariate analysis and include several examples of applications of QbD in actual practice This important resource Covers the essential information about Quality by Design QbD that is at the heart of modern pharmaceutical development Puts the focus on the industrial aspects of the new QbD approach Includes several illustrative examples of applications of QbD in practice Offers advanced specialist topics that can be systematically applied to industry Pharmaceutical Quality by Design offers a guide to the principles and application of Quality by Design QbD the holistic approach to manufacturing that offers a complete understanding of the manufacturing processes involved in order to yield consistent and high quality products

The Evolution of Economic Wellbeing Zuhayr Mikdashi, 2018-12-19 Throughout history humans have sought to enhance their wellbeing across various domains Though the spectrum of factors responsible for wellbeing has widened considerably and advances have been realized in scientific technological fields significant failures have been encountered in establishing peaceful relations among various communities and the natural environment has been degraded inconsiderately by humans since the Industrial Revolution This book identifies the key factors that influence changes in wellbeing both positively and negatively within a framework of socio economic globalization instantaneous interconnectedness and rising environmental risks These clusters of progress comprise essentially the following seven areas bolstering peace and security respecting universal fundamental values satisfying personal and social basic needs expanding

knowledge and managerial technological skills promoting arts and culture husbanding natural resources and protecting the environment and concerting actions for the global common good The term progress is used here to mean an all embracing sustainable advancement towards desirable goals be they material or non material offering higher levels of wellbeing to individuals and to society at large compared to previous or current conditions In unravelling the progress conundrum the author draws on his own original research and field work experiences which dovetail with those of other scholars by complementing their findings and or by offering different appraisals The author adopts an inter disciplinary approach that overcomes the silo like compartmentalization of fields of study The said approach enables us to reach a better understanding of the complex reality of progress or regression in various domains

Governance of Dual Use Research in the Life Sciences National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Life Sciences, 2018-12-26 Continuing advances in science and technology offer the promise of providing tools to meet global challenges in health agriculture the environment and economic development some of the benefits are already being realized However such advances have the potential to challenge the oversight systems for responsible conduct of life sciences research with dual use potential research that may have beneficial applications but that also could be misused to cause harm Between June 10 and 13 2018 more than 70 participants from 30 different countries and 5 international organizations took part in an international workshop The Governance of Dual Use Research in the Life Sciences Advancing Global Consensus on Research Oversight to promote global dialogue and increased common understandings of the essential elements of governance for such research Hosted by the Croatian Academy of Sciences and Arts in Zagreb Croatia the workshop was a collaboration among the InterAcademy Partnership the Croatian Academy the Croatian Society for Biosafety and Biosecurity and the U S National Academies of Sciences Engineering and Medicine This publication summarizes the presentations and discussions from the workshop

Governance of Biotechnology in Post-Soviet Russia Tatyana Novossiolova, 2017-07-19 This book provides an up to date analysis of the governance of biotechnology in post Soviet Russia The rapid advancement of the life sciences over the past few decades promises to bring tremendous benefits but also raises significant social ethical legal and security risks Nations adaptability to the twin challenges of attempting to secure the benefits while reducing the risks and threats is a large and still burgeoning governance challenge Here Novossiolova cuts across several sets of literature bringing together elements of the anthropological study of culture history of science and technology management and international governance and Soviet history and politics Due to its multidisciplinary approach in depth analysis accessible style and extensive reference list this text offers invaluable insights into the normative dimensions of the governance of biotechnology unpacking both the formal and intangible attributes and artefacts of biotechnology policy and practice in Russia

Philosophical Foundations of the African Humanities through Postcolonial Perspectives , 2019-03-19 Philosophical Foundations of the African Humanities through Postcolonial Perspectives critiques recent claims that the

humanities especially in public universities in poor countries have lost their significance defining missions methods and standards due to the pressure to justify their existence The predominant responses to these claims have been that the humanities are relevant for creating a world culture to address the world s problems This book argues that behind such arguments lies a false neutrality constructed to deny the values intrinsic to marginalized cultures and peoples and to justify their perceived inferiority These essays by scholars in postcolonial studies critique these false claims about the humanities through critical analyses of alterity difference and how the Other is perceived defined and subdued Contributors Gordon S K Adika Kofi N Awoonor E John Collins Kari Dako Mary Esther Kropp Dakubu James Gibbs Helen Lauer Bernth Lindfors J H Kwabena Nketia Abena Oduro Gayatri Chakravorty Spivak Ol f mi T w Alexis B Tengan Kwasi Wiredu Francis Nii Yartey

Cryptocurrency Regulation Immaculate Dadiso Motsi-Omoijiade,2022-06-16 This work argues that current cryptocurrency regulation particularly in the areas of enforcement and compliance is inadequate It proposes reflexive regulation as an alternative approach This book provides strategies for a reflexive regulation approach to cryptocurrencies developed through the identification of the internal self regulatory mechanisms of the cryptocurrency system Apportioning blame for current problems to the regulators failure to take into account the inherent technical features of cryptocurrencies the work promotes reflexive regulation in which the law acts at a subsystem specific level to install correct and redefine democratic self regulatory mechanisms It provides strategies for this approach developed through the identification of the internal self regulatory mechanisms of the cryptocurrency system These are identified as imbedded in the technical functionality of computer code and consensus based distributive governance mechanisms respectively In addition to providing a technical historical and legal overview of cryptocurrencies the book concludes by providing recommendations aimed at redirecting code and consensus towards achieving regulatory goals In this way it draws from the theory of reflexive law in order to provide both a substantive and jurisprudential perspective on the regulation of cryptocurrencies and to illustrate how Financial Technology Fintech regulation can only be effective once regulators consider both the Fin and the tech in their regulatory approaches The book will be of interest to researchers academics and policy makers working in the areas of Financial Regulation and Jurisprudence Financial Crime Banking Regulation Information Systems and Information Technology Routledge Handbook of Agricultural Biodiversity Danny Hunter,Luigi Guarino,Charles Spillane,Peter C. McKeown,2017-10-03 The world relies on very few crop and animal species for agriculture and to supply its food needs In recent decades there has been increased appreciation of the risk this implies for food security and quality especially in times of environmental change As a result agricultural biodiversity has moved to the top of research and policy agendas This Handbook presents a comprehensive overview of our current knowledge of agricultural biodiversity in a series of specially commissioned chapters It draws on multiple disciplines including plant and animal genetics ecology crop and animal science food studies and nutrition as well as social science subjects which explore the socio economic cultural institutional legal and

policy aspects of agricultural biodiversity It focuses not only on the core requirements to deliver a sustainable agriculture and food supply but also highlights the additional ecosystem services provided by a diverse and resilient agricultural landscape and farming practices The book provides an indispensable reference textbook for a wide range of courses in agriculture ecology biodiversity conservation and environmental studies Water management for sustainable agriculture Prof. T. Oweis, 2018-07-09 Comprehensive review of the range of water resources from groundwater and surface water to rainwater floodwater and waste water Discusses advances in irrigation techniques from surface irrigation to micro drip irrigation and fertigation Assesses methods for optimising agricultural water use in rainfed and other systems
