The Future of English in Asia Michael O'Sullivan, David Huddart, Carmen Lee, 2015-10-05

This collection is unique in bringing together key thinkers on language and literature to discuss the future of English in Asia. Many of the contributors are themselves responsible for important sub genres in English linguistics and literary studies and this collection gives them the opportunity to respond to each other directly. The different chapters also respond to different contemporary debates and emerging trends and discourses that are hugely important for the future of English language teaching in schools across Asia. This volume is also ground breaking in bringing English literary studies and Applied English Linguistics together in the contemporary Asian context. The Future of English in Asia includes studies on the following subject areas: Cultural Translation in World Englishes, Multilingual Education, English Futures and the function of Literature, English Literary Studies in Japan and English and Social Media in Asia. Well into this century it appears that it is still very difficult to know what to expect when it comes to the future of English. The future of English will continue to be determined by complex local contexts. As it has in other parts of the world, the future of English in Asia will continue to rely on the proliferation of its transformations as much as its hegemonic status. This volume reflects the widespread acknowledgement that whatever future English has will inevitably be shaped by its fate in Asia. The collection will be a welcome resource for scholars and students of English linguistics, English literary studies and topics related to the teaching of English in Asia.

Intestinal Failure Jeremy M.D. Nightingale, 2023-10-03. This is the second and fully updated edition of the successful volume on intestinal failure in adults and children. The book provides a comprehensive coverage of all aspects of intestinal failure from acute and chronic intestinal failure, management and treatment to outcomes, consequences and problems of treatment. In addition, 20 new chapters have been added covering acute and chronic pancreatitis, critical care and abdominal pain among other topics. Each of the chapters contains a section with top tips on the topic, summarizing the essential take home messages. Highly educational, this book is a must have for gastroenterologists but is of use for all members of a hospital nutrition support team including nurses, dietitians and pharmacists whom it will serve as a practical guide for management of intestinal failure both in the hospital and in an outpatient setting. Written by a multidisciplinary author team, this book brings this important subject to a wide readership. With extensive referencing, the book provides a detailed overview of the topic, discussing the latest research in the subject and how this relates to current clinical practice and potential future treatments.
