Asma,2017-06-21 Consider Miles Davis horn held high sculpting a powerful musical statement full of tonal patterns inside jokes and thrilling climactic phrases all on the fly Or think of a comedy troupe riffing on a couple of cues from the audience until the whole room is erupting with laughter Or maybe it's a team of software engineers brainstorming their way to the next Google or the Einsteins of the world code cracking the mysteries of nature Maybe it's simply a child playing with her

toys What do all of these activities share With wisdom humor and joy philosopher Stephen T Asma answers that question in this book imagination And from there he takes us on an extraordinary tour of the human creative spirit Guided by neuroscience animal behavior evolution philosophy and psychology Asma burrows deep into the human psyche to look right at the enigmatic but powerful engine that is our improvisational creativity the source he argues of our remarkable imaginal capacity How is it he asks that a story can evoke a whole world inside of us How are we able to rehearse a skill a speech or even an entire scenario simply by thinking about it How does creativity go beyond experience and help us make something completely new And how does our moral imagination help us sculpt a better society As he shows we live in a world that is only partly happening in reality Huge swaths of our cognitive experiences are made up by what ifs almosts and maybes an imagined terrain that churns out one of the most overlooked but necessary resources for our flourishing possibilities Considering everything from how imagination works in our physical bodies to the ways we make images from the mechanics of language and our ability to tell stories to the creative composition of self consciousness Asma expands our personal and day to day forms of imagination into a grand scale as one of the decisive evolutionary forces that has guided human development from the Paleolithic era to today The result is an inspiring look at the rich relationships among improvisation imagination and culture and a privileged glimpse into the unique nature of our evolved minds Advances in Autonomous Robotics Systems Michael Mistry,Aleš Leonardis,Mark Witkowski,Chris Melhuish,2014-08-23 This book constitutes the refereed proceedings of the 15th Conference on Advances in Autonomous Robotics TAROS 2014 held in Birmingham UK in September 2014 The 23 revised full papers presented together with 9 extended abstracts were carefully reviewed and selected from 48 submissions The overall program covers various aspects of robotics including navigation planning sensing and perception flying and swarm robots ethics humanoid robotics human robot interaction and social robotics Refuge and Resistance Anne Irfan,2023-07-18 In the decades after World War II the United Nations established a global refugee regime that became central to the lives of displaced people around the world This regime has exerted particular authority over Palestinian refugees who are served by a specialized UN body the Relief and Works Agency UNRWA Formed shortly after the 1948 war UNRWA continues to provide quasi state services such as education and health care to Palestinian refugee communities in the Middle East today This book is a groundbreaking international history of Palestinian refugee politics Anne Irfan traces the history and politics of UNRWA s interactions with Palestinian communities particularly in the refugee camps where it functioned as a surrogate state She shows how Palestinian refugees invoked internationalist norms to demand their political rights while resisting the UN s categorization of their plight as an apolitical humanitarian issue Refuge and Resistance foregrounds how nonelite activism shaped the Palestinian campaign for international recognition showing that engagement with world politics was driven as much by the refugee grass roots as by the upper echelons of the Palestine Liberation Organization It demonstrates that refugee groups are important actors in global politics

not simply aid recipients Recasting modern Palestinian history through the lens of refugee camps and communities Refuge and Resistance offers vital new perspectives for understanding politics beyond the nation state **Bloomberg** Chris McNickle,2017-09-19 Examine the Bipartisan Legacy of a Remarkable Billionaire Politician Bloomberg A Billionaire s Ambition tells the story of how one of America s most successful entrepreneurs was elected mayor of New York City and what he did with the power he won Bloomberg s stunning victory against all odds just weeks after the 9 11 terrorist attack left him facing challenges unlike any mayor in history For the next twelve years he kept the city safe managed budgets through fiscal crises promoted private sector growth generated jobs built infrastructure protected the environment supported society s cultural sensibilities and achieved dramatic improvements in public health Bloomberg was an activist executive who used government assets boldly and wisely for the greatest good for the greatest number of people His time as mayor was not without controversy Bloomberg supported stop and frisk police tactics that a judge ruled unconstitutional and jailhouse violence rose to levels so severe the federal government intervened The administration s homeless policies were ineffective And he forced a change in the city charter to allow him to serve a third term Overall record low crime and the lasting impact of innovative policies will cause his tenure to be remembered as a remarkable success Having returned to his global media empire and to his private philanthropy Bloomberg continues to challenge the National Rifle Association on gun control promote national education reform and support policies to combat climate change Frequently touted as an independent candidate for president Bloomberg leaves behind a legacy of effective government Shenandoah Sue Eisenfeld,2015-02 For fifteen years Sue Eisenfeld hiked in Shenandoah National Park in the Virginia Blue Ridge Mountains unaware of the tragic history behind the creation of the park In this travel narrative she tells the story of her on the ground discovery of the relics and memories a few thousand mountain residents left behind when the government used eminent domain to kick the people off their land to create the park With historic maps and notes from hikers who explored before her Eisenfeld and her husband hike backpack and bushwhack the hills and the hollows of this beloved but misbegotten place searching for stories Descendants recount memories of their ancestors grieving themselves to death and they continue to speak of their people s displacement from the land as an untold national tragedy Shenandoah A Story of Conservation and Betrayal is Eisenfeld s personal journey into the park s hidden past based on her off trail explorations She describes the turmoil of residents removal as well as the human face of the government officials behind the formation of the park In this conflict between conservation for the benefit of a nation and private land ownership she explores her own complicated personal relationship with the park a relationship she would not have without the heartbreak of the thousands of people removed from their homes **Captivating Technology** Ruha Benjamin,2019-06-07 The contributors to Captivating Technology examine how carceral technologies such as electronic ankle monitors and predictive policing algorithms are being deployed to classify and coerce specific populations and whether these innovations can be appropriated and reimagined for more liberatory ends Our
