Solomon, David Kim, 2021-01-15 Today's networks are required to support an increasing array of real time communication methods. Video chat and live resources put demands on networks that were previously unimagined. Written to be accessible to all, *Fundamentals of Communications and Networking Third Edition* helps readers better understand today's networks and the way they support the evolving requirements of different types of organizations. While displaying technical depth, this new edition presents an evolutionary perspective of data networking from the early years to the local area networking boom to advanced IP data networks that support multimedia and real time applications. The Third Edition is loaded with real world examples, network designs and network scenarios that provide the reader with a wealth of data networking information and practical implementation tips.

Key Features of the third Edition:

- Introduces network basics by describing how networks work.
- Discusses how networks support the increasing demands of advanced communications.
- Illustrates how to map the right technology to an organization's needs and business goals.
- Outlines how businesses use networks to solve business problems both technically and operationally.

Study Guide 300-435 ENAUTO: Automating and Programming Cisco Enterprise Solutions Certification Exam

Anand Vemula, *The Automating and Programming Cisco Enterprise Solutions 300-435 ENAUTO study guide* offers a comprehensive approach to mastering network automation with Cisco solutions. Covering key topics from basic network programmability to advanced automation techniques, this guide equips readers with the skills needed to manage, configure and automate network devices and services efficiently. It begins with an overview of network programmability and automation, contrasting traditional networking methods with software defined networking (SDN) and introduces essential tools like APIs and model driven programmability. The guide then delves into Python programming, emphasizing its application for network automation with practical scripts and usage of popular networking modules like Netmiko, Paramiko and Requests. Chapters focused on Cisco's tools such as Cisco DNA Center, SD-WAN, vManage and Meraki explore their automation capabilities. Practical exercises are included to demonstrate how to use these APIs for automating tasks such as policy configurations and troubleshooting. The guide also covers telemetry, NETCONF and RESTCONF, providing readers with in depth knowledge of model driven telemetry and device configuration automation. It concludes with a focus on troubleshooting automation workflows, integration with CI/CD tools like Jenkins and GitLab and version control using Git and GitHub. Through detailed explanations and real world use cases, the guide prepares readers for success in automating Cisco enterprise networks, equipping them with the practical knowledge required to excel in the 300-435 ENAUTO exam and beyond.
