**Global Mathematics and Mathematics Olympiad Graded Assessment Test with Competition: Mathematics - Assessment Outline, Sample Paper, Marking Scheme**

Mathematician, Global Mathematics and Mathematics Olympiad Graded Assessment Test consists of separate assessments for the Mathematics and Mathematics Olympiad. Currently, there are 16 levels, with each level corresponding to a grade. Similar to music exams, there is no age restriction for participating in each level of assessment. Furthermore, we do not require participants to achieve a passing grade or above in previous levels or to have participated in previous level assessments to participate in subsequent levels. Global Mathematics and Mathematics Olympiad Graded Assessment Test offers physical and online tests. The transcript and certificate will indicate the exam mode, whether it was taken physically or online, for reference. Participants of a certain age will participate in the Global Mathematics and Mathematical Olympiad Graded Competition simultaneously with the Global Mathematics and Mathematical Olympiad Graded Assessment Test. The following are our visions:

1. To enable individuals with high mathematical aptitude to learn advanced mathematics and Olympiad mathematics more quickly, accelerating human progress and benefiting humanity.
2. In the future, academic qualifications will not be divided; instead, recruitment standards in the workplace will be based on grades obtained in various subjects and their levels from public assessments.
3. People with weaker mathematical abilities should spend the same amount of time mastering basic mathematics. Once they reach the level required for their chosen profession or further studies, they can stop, rather than forcing themselves to study mathematics in higher grades.
4. By utilizing public assessments, we can reduce the workload of teachers, thereby reducing the future demand for mathematics teachers. This allows talented individuals who are capable of dedicating themselves to mathematics education to contribute to an ever-expanding reservoir of mathematical knowledge, facilitating the continuous development of the mathematical field.

**Teaching Secondary School Mathematics: Techniques And Enrichment**

Alfred S Posamentier, Beverly Smith, 2020-09-18

The primary aim of this book is to provide teachers of mathematics with all the tools they would need to conduct most effective mathematics instruction. The book guides teachers through the all-important planning process, which includes short and long-term planning, as well as constructing most effective lessons with an emphasis on motivation, classroom management, emphasizing problem-solving techniques, assessment, enriching instruction for students at all levels, and introducing relevant extracurricular mathematics activities. Technology applications are woven throughout the text. A unique feature of this book is the second half, which provides 125 highly motivating enrichment units for all levels of secondary school mathematics. Many years of proven success makes this book essential for both pre-service and in-service mathematics teachers.
