Mini Lessons For Early Multiplication And Division:

Minilessons for Early Multiplication and Division Willem Uttenbogaard, Catherine Twomey Fosnot, 2008-03 A resource of 75 minilessons designed to be used at the start of a math workshop and to last for ten to fifteen minutes

Minilessons for Extending Multiplication and Division Willem Uttenbogaard, Catherine Twomey Fosnot, 2008-03 Minilessons for Extending Multiplication and Division is one of two yearlong resource guides in Contexts for Learning Mathematics Investigating Multiplication and Division 3 5 Minilessons for Extending Multiplication and Division can be helpful in grades 4 5 as students work with multiplication and division beyond the basic facts This guide contains 77 minilessons structured as strings of related computation problems They are likely to generate discussion of certain strategies or big ideas that are landmarks on the landscape of learning for multiplication and division particularly using numbers with two and three digits Although the emphasis is on the development of mental arithmetic strategies this does not mean learners have to solve the problems in their heads but it is important for them to do the problems with their heads In other words as you use this guide encourage students to examine the numbers in each problem and think about clever efficient ways to solve it The relationships between the problems in the minilesson will support students as they progress through the string The open array is used throughout to represent student strategies To learn more visit <http://www.contextsforlearning.com>

Fluency Doesn't Just Happen in Multiplication and Division Nicki Newton, Ann Elise Record, Alison J. Mello, 2024-06-20 Fluency in math doesn't just happen it is a well planned journey In this book you'll find practical strategies and activities for teaching your elementary students basic multiplication and division The authors lay out the basic framework for building math fluency using a cycle of engagement concrete pictorial abstract and provide a multitude of examples illustrating the strategies in action You'll learn how to help students to model their thinking with a variety of tools keep students engaged through games poems songs and technology assess student development to facilitate active and continuous learning implement distributed practices throughout the year and boost parental involvement so that students remain encouraged even as material becomes more complex A final chapter devoted to action plans will help you put these strategies into practice in your classroom right away Most importantly you'll open the door to deep and lasting math fluency
