Specific aim of the book is to provide direct to the point surgical pearls which can be adapted to the daily practice instantly by the target audience. The book includes chapters on relevant surgical anatomy, principles of MIS, management of camera systems, video image editing, initiating a successful MIS practice, improving efficiency of current MIS program, how to develop successful teaching techniques in academic setting, avoiding managing MIS related surgical complications and preoperative/postoperative care before covering MIS for individual conditions including intensive care managements. Chapters are written by world renowned authorities. ACOG guideline recently published a statement recommending vaginal hysterectomy and endoscopic hysterectomy should be considered as a first step of surgical choice. Current practice has been shifting from open cases to laparoscopic/robotic assisted cases while vaginal cases stay steady.
