Simulation and Game-Based Learning in Emergency and Disaster Management Drumhiller, Nicole K., Wilkin, Terri L., Srba, Karen V., 2021-04-02 Simulation and game based learning are essential applications in a learning environment

as they provide learners an opportunity to apply the course material in real life scenarios Introducing real life learning allows the learner to make critical decisions at different points within the simulation providing constructive education that leads to a cognitive understanding of the material The use of simulations provides the learner with the ability to cognitively store and recall learning in real life experiences Therefore it is crucial to not only provide course material but to have students apply what they have learned in simulations that replicate real life scenarios These learned skills are essential for students to be marketable and thrive in a career field where decision making problem solving and critical thinking are job requirements Simulation and Game Based Learning in Emergency and Disaster Management is a cutting edge research book that examines the best practices and holistic development when it comes to simulation learning within emergency and disaster management as well as global security Drawing upon the neuroscience of learning classroom instruction can be enhanced to incorporate active experiential learning activities that positively impact a learner with long term information retention Each simulation project is carried out in different environments with different goals in mind and developed under various constraints For these reasons this book will provide insight into the simulation planning and development process provide examples of online simulations and game based learning activities and provide insight on simulation development and implementation that can be used across disciplines in educational and training settings As such it is ideal for academicians instructional designers curriculum designers education professionals researchers and students Games and Learning Alliance Alessandro De Gloria,2014-10-25 This book constitutes the refereed proceedings of the Second International Conference on Games and Learning Alliance GALA 2013 held in Paris France in October 2013 The 25 revised papers presented together with 9 poster papers were carefully reviewed and selected from numerous submissions The papers advance the state of the art in the technologies and knowledge available to support development and deployment of serious games They are organized in 3 research tracks on design technology and application Also included is the outcome of a GALA workshop on a widely applied instructional design model 4C ID Health Care Management and the Law Donna K. Trends in Advanced Intelligent Control, Optimization and Automation Wojciech Mitkowski, Janusz Kacprzyk, Krzysztof Oprządkiewicz, Paweł Skrzuch, 2017-06-06 This volume contains the proceedings of the KKA 2017, the 19th Polish Control Conference organized by the Department of Automatics and Biomedical Engineering, AGH University of Science and Technology in Kraków, Poland, on June 18-21, 2017, under the auspices of the Committee on Automatic Control and Robotics of the Polish Academy of Sciences and the Commission for Engineering Sciences of the Polish Academy of Arts and Sciences. Part 1 deals with general issues of modeling and control, notably flow modeling and control, sliding mode, predictive, dual, etc. control. In turn, Part 2 focuses on optimization, estimation and prediction for control. Part 3 is concerned with autonomous vehicles, while Part 4 addresses applications. Part 5 discusses computer methods in control, and Part 6 examines fractional order calculus in the modeling and control of dynamic systems. Part 7 focuses on modern robotics. Part 8 deals with modeling and identification, while Part 9 deals with problems related to security, fault detection and diagnostics. Part 10 explores intelligent systems in automatic control, and Part 11 discusses the use of control tools and techniques in biomedical engineering. Lastly, Part 12 considers engineering education and teaching with regard to automatic control and robotics.

Disaster Nursing and Emergency Preparedness Tener Goodwin Veenema, 2018-07-28 What a wonderful resource! Doody's Medical Reviews. The 4th Edition is unique in recognizing the rapid changes in both the causes of crises and the latest attempts to provide timely multidisciplinary approaches to the practice of this growing specialty. Evident throughout this edition is the call to identify crisis leadership among the increasingly talented base of nurses who have responsibility to move the profession to recognize and accept that they can be advocates for better planning, coordination, education and training. Frederick M. Burkle Jr., MD, MPH, DTM, PhD, Hon. FAAP, FACEP, Senior Fellow, Scientist, Harvard Humanitarian Initiative, Harvard University, T. C. Chan School of Public Health. From the Foreword: This impressive edition builds upon the solid foundation of the first three award-winning editions with an expanded focus on climate change-related disasters.
