It discusses current challenges such as how to improve the perceptual and cognitive abilities of robots, develop suitable synthetic vision systems, cope with degraded reliability in unmanned systems, predict robotic behavior in case of a loss of communication, the vision for future soldier robot teams, human agent teaming, real world implications for human robot interaction, and approaches to standardize both the display and control of technologies across unmanned systems. Based on the AHFE 2017 International Conference on Human Factors in Robots and Unmanned Systems held on July 17-21 in Los Angeles, California, USA, this book is expected to foster new discussion and stimulate new advances in the development of more reliable, safer, and highly functional devices for carrying out automated and concurrent tasks.

The Emotion Code Dr. Bradley Nelson, 2019-05-07. I believe that the discoveries in this book can change our understanding of how we store emotional experiences and in so doing change our lives. The Emotion Code has already changed many lives around the world, and it is my hope that millions more will be led to use this simple tool to heal themselves and their loved ones. Tony Robbins. In this newly revised and expanded edition of The Emotion Code, renowned holistic physician and lecturer Dr. Bradley Nelson skillfully lays bare the inner workings of the subconscious mind. He reveals how emotionally charged events from your past can still be haunting you in the form of trapped emotions, emotional energies that literally inhabit your body. These trapped emotions can fester in your life and body, creating pain, malfunction, and eventual disease. They can also extract a heavy mental and emotional toll on you, impacting how you think, the choices that you make, and the level of success and abundance you are able to achieve. Perhaps most damaging of all, trapped emotional energies can gather around your heart, cutting off your ability to give and receive love. The Emotion Code is a powerful and simple way to rid yourself of this unseen baggage. Dr. Nelson's method gives you the tools to identify and release the trapped emotions in your life, eliminating your emotional baggage and opening your heart and body to the positive energies of the world. Filled with real world examples from many years of clinical practice, The Emotion Code is a distinct and authoritative work that has become a classic on self-healing.

Tactics of Interfacing

Ksenia Fedorova, 2020-08-11 How digital technologies affect the way we conceive of the self and its relation to the world considered through the lens of media art practices In Tactics of Interfacing Ksenia Fedorova explores how digital technologies affect the way we conceive of the self and its relation to the world With the advent of ubiquitous computing the self becomes an object of technological application increasingly defined by data received from tracking technologies Subtly these technologies encourage versions of ourselves that are easier to interpret computationally Fedorova views these shifts in self perception through the lens of contemporary media art practices examining a range of artistic tactics that enable embodied and intimate experiences of machinic operations on our lives At the center of Fedorova's analysis are the mechanisms that structure the relations between the self and the world at the level of the interface she considers interfacing a process in which interrelation happens and different agencies play off against each other She discusses such topics as interfaciality and the face as a medium self image and the boundaries of the self understood through technological mediation of an embodied experience the relation between the self

and the other reshaped by algorithmic technologies and the augmentation and alteration of spatial perception The artworks Fedorova discusses present scenarios of interfacing that range from responsive environments to artificial intelligence conversational agents She shows that art and aesthetic experience offer fruitful ways to reflect on the effects of contemporary technological culture enabling encounters that shift our perspectives on the boundaries of the self and challenge the very capacity to feel human
