Technologies for Meat Processing Fidel Toldrá, Leo M. L. Nollet, 2017-10-10 As with the first edition, the main goal of Advanced Technologies for Meat Processing is to provide the reader with recent developments in new advanced technologies for the full meat processing chain. This book is written by distinguished international contributors with recognized expertise and excellent reputations and brings together all the advances in a wide and varied number of technologies that are applied in different stages of meat processing. This second edition contains 21 chapters combining updated and revised versions of several chapters with entirely new chapters that deal with new online monitoring techniques like hyperspectral imaging and

Raman spectroscopy the use of nanotechnology for sensor devices or new packaging materials and the application of omics technologies like nutrigenomics and proteomics for meat quality and nutrition The book starts with the control and traceability of genetically modified farm animals followed by four chapters reporting the use of online non destructive monitoring techniques like hyperspectral imaging and Raman spectroscopy real time PCR for pathogens detection and nanotechnology based sensors Then five chapters describe different advanced technologies for meat decontamination such as irradiation hydrostatic and hydrodynamic pressure processing other non thermal technologies and the reduction in contaminants generation Nutrigenomics in animal nutrition and production is the object of a chapter that is followed by five chapters dealing with nutritional related issues like bioactive peptides functional meats fat and salt reduction processing of nitrite free products and the use of proteomics for the improved processing of dry cured meats The last four chapters are reporting the latest developments in bacteriocins against meat borne pathogens the functionality of bacterial starters modified atmosphere packaging and the use of new nanotechnology based materials for intelligent and edible packaging

The Real Cost of Cheap Food Michael Carolan,2024-09-11 This thought provoking accessible book critically examines the dominant food regime on its own terms by seriously asking whether we can afford cheap food and by exploring what exactly cheap food affords us The author shows why today s global food system produces just the opposite of what it promises The food produced under this regime is in fact exceedingly expensive Many of these costs will be paid for in other ways or by future generations and cheap food today may mean expensive food tomorrow By systematically assessing these costs the book delves into issues related but not limited to the food system the environment sustainable development health and social justice In this new edition the author brings all data and citations fully up to date Increased coverage is given to many topics including climate change vertical agriculture global pandemics geopolitical instability agriculture 4 0 alternative proteins and food justice Detailing the numerous ways that our understanding of food has narrowed such as its price per ounce combination of nutrients yield per acre or calories the book argues for a more contextual view of food when debating its affordability Expanding an innovation introduced in the second edition concrete case studies of collective mobilization can be found throughout all chapters to support a narrative that balances being critical with being hopeful This book is essential reading for those interested in critical food studies food and agriculture and a sustainable and socially just food system

Food Safety for the 21st Century Carol A. Wallace,William H. Sperber,Sara E. Mortimore,2011-06-09 The HACCP Hazard Analysis and Critical Control Points system is still recognised internationally as the most effective way to produce safe food throughout the supply chain but a HACCP system cannot operate in a vacuum It requires prerequisite programmes to be in place and it can be highly affected by or dependent upon other major considerations such as animal plant human and environmental health food security and food defence This book Provides a practical and up to date text covering the essentials of food safety management in the global supply chain giving the reader the knowledge and skills that they need to

design implement and maintain a world class food safety programme Builds on existing texts on HACCP and food safety taking the next step forward in the evolution of HACCP and providing a text that is relevant to all sectors and sizes of food businesses throughout the world Shares practical food safety experience allowing development of best practice approaches This will allow existing businesses to improve their systems and enable businesses that are new to HACCP and food safety management requirements in both developed and developing countries to build on existing knowledge for more rapid application of world class food safety systems Educates practitioners such that they will be able to use their judgement in decision making and to influence those who make food policy and manage food operations This book is an essential resource for all scientists and managers in the food industry manufacturing and foodservice regulators and educators in the field of food safety and students of food science and technology
