A consensus has emerged that corporations have societal and environmental responsibilities when operating transnationally. However, how exactly corporations can be held legally accountable for their transgressions if at all is less clear. This volume inquires how regulatory tools stemming from international law, public law and private law may or may not be used for transnational corporate accountability purposes. Attention is devoted to applicable standards of liability, institutional and jurisdictional issues and practical challenges with a focus on ways to improve the existing legal status quo. In addition, there is consideration of the extent to which non-legal regulatory instruments may complement or provide more viable alternatives to

these legal mechanisms The book combines legal doctrinal approaches with comparative interdisciplinary and policy insights with the dual aim of furthering the legal scholarly debate on these issues and enabling higher quality decision making by policymakers seeking to implement regulatory measures that enhance corporate accountability in this context Through its study of contemporary developments in legislation and case law it provides a timely and important contribution to the scholarly and sociopolitical debate in the fast evolving field of international corporate social responsibility and accountability
