Reproduction biology in grey wolves *Canis lupus* in Belarus: Common beliefs versus reality Vadim

Sidorovich, Irina Rotenko, 2019-08-01 This scientific monograph gives a detailed information about reproduction biology in the grey wolf *Canis lupus* in Belarus This topic includes the wolf breeding mating and denning behavior fertility of the species and mortality of its pups The initial material was not collected occasionally from wolf hunters and wolf pup searchers but mainly gained by authors first hand according to a well set research design and long term By analyzing the gathered data we became convinced that in the wolf reproduction biology there are more exceptions than rules Therefore the standard

patterns of reproduction biology in wolves that are wide spread in the published literature about the species we call as common beliefs that are given versus the wolf reality that we have found in Belarus Concerning the non standard features in the wolf reproduction biology we revealed that multiple breeding in wolf pack is a common phenomenon breeding of yearling females and wolf dog hybridization were found to be irrespective the food base and strongly depending on the species population density i e they are reproduction regulations Wolf pup mortality was investigated and the crucial role of deliberate predation of lynxes on wolf pups was revealed **Dog Behaviour, Evolution, and Cognition** Adam Miklosi,2007-11-29

The first book to summarize the burgeoning research literature on the behavioural ecology of the dog It presents a new ecological approach to the understanding of dog behaviour and highlights directions for future research Providing links to human and primate behaviour research it will appeal to anyone interested in behavioural ecology *A Research Strategy to Examine the Taxonomy of the Red Wolf* National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Board on Agriculture and Natural Resources,Board on Life Sciences,Committee on Assistance to the U.S. Fish and Wildlife Service on Taxonomic Studies of the Red Wolf: A Review of Applications to Carry Out Research and Development of a Research Strategy,2021-01-29 A Research Strategy to Examine the Taxonomy of the Red Wolf provides independent guidance about taxonomic research on the red wolf *Canis rufus* Building from the 2019 report Evaluating the Taxonomic Status of the Mexican Gray Wolf and the Red Wolf this report reviews and ranks research applications to determine the taxonomy of wild canid populations in southern Louisiana and other relevant locations The report then develops a research strategy to examine the evolutionary relationships between ancient red wolves the extant managed red wolf populations and the unidentified canid populations *Dog Behaviour, Evolution, and Cognition* Ádám Miklósi,2015 This is the first book to collate and synthesize the recent burgeoning primary research literature on dog behaviour evolution and cognition The author presents a new ecological approach to the understanding of dog behaviour demonstrating how dogs can be the subject of rigorous and productive scientific study without the need to confine them to a laboratory environment This second fully updated edition of *Dog Behaviour Evolution and Cognition* starts with an overview of the conceptual and methodological issues associated with the study of the dog followed by a brief description of their role in human society An evolutionary perspective is then introduced with a summary of current research into the process of domestication The central part of the book is devoted to issues relating to the cognitive aspects of behaviour which have received particular attention in recent years from both psychologists and ethologists The book s final chapters introduce the reader to many novel approaches to dog behaviour set in the context of behavioural development and genetics This second edition recognises and discusses the fact that dogs are increasingly being used as model organisms for studying aspects of human biology such as genetic diseases and ageing Specific attention is also given in this edition to attachment behaviour which emerges between humans and dogs the importance of inter specific communication in the success of dogs in human communities and the broad aspects

of social cognition and how this may contribute to human dog cooperation Directions for future research are highlighted throughout the text which also incorporates links to human and primate research by drawing on homologues and analogies in both evolution and behaviour The book will therefore be of relevance and use to anyone with an interest in behavioural ecology including graduate students of animal behaviour and cognition as well as a more general audience of dog enthusiasts biologists psychologists veterinarians and sociologists Bulletin (United States.
