Kangzhan Leland Ness,Bin Shih,2016-09-16 *Kangzhan* Guide to Chinese Ground Forces 1937 45 is the first ready reference to the organization and armament of Chinese

ground forces during the Sino Japanese War of 1937-45. The work integrates Chinese, Japanese and Western sources to examine the details of the structure and weapons of the period. Recent scholarship has contributed greatly to our understanding of China's role in the war but this is the first book to deal with the bottom level underpinnings of this massive army crucial to an understanding of its tactical and operational utility. An introductory chapter discusses the military operations in China often given short shrift in World War II histories. The work then traces the evolution of the national army's organizational structure from the end of the Northern Expedition to the conclusion of World War II. Included are tables of organization and strength reports for the wartime period. The armament section illustrates and details not only the characteristics of the many and varied weapons used in China many seen nowhere else but also their acquisition and such local production as was undertaken. This is complemented by a chapter on the arsenals and their evolution and production programs. The Chinese army was one of the largest of the war and it and Japan's fought longer than any other. It faced unique challenges including fragmented loyalties, huge expanses of territory, poor logistics, networks, inadequate arms supplies and often incompetence and corruption. Nevertheless they fought bravely in major battles through 1941 and were able to counterpunch effectively in important regions through the rest of the war. Aimed at both military historians and wargamers, this work fills an important gap in our understanding of this the most underappreciated army of the war. **A**

Comprehensive Small Arms Manual for State Guards, Regular Police Departments, Auxiliary Police Departments, Coast Guard Auxiliaries, Plant Guards and Civilians Charles Tower Haven, 1943 *The Art of Revolver Shooting* Walter Winans, 1911-01-02. The highly readable American classic by the definitive expert of that era. Walter W. Winans, born April 5, 1852, was a stand-out American marksman, horse breeder, sculptor and painter who participated in the 1908 and 1912 Summer Olympics. He won two medals for shooting: a gold in 1908 and a silver in 1912, as well as demonstrating the sport of pistol duelling in the 1908 Games. He was the author of ten books on shooting of which this was the first. The Winans range at the National Shooting Centre, Bisley, England, is named after him. His book covers a wide range of history, design, developments and marksmanship technique of the revolver. It has a special focus on techniques used at the classic Bisley competitions in England during the Victorian era, including stages that featured rapid fire, moving and disappearing targets, with valuable tips that may be of interest to Action Shooter competitors. Shooters on any level will find something of value in this truly outstanding gem of shooting literature. Original book description: 1911 New Edition Revised and enlarged. Mr. Walter Winans, the well-known champion revolver shot, has been for many years working out the theory and practice of revolver shooting and this is the first occasion of his publishing the collected results of his close study of the weapon. Although several chapters of the book give minute instructions as to how to shoot in order to win prizes at the Bisley meeting, the author has not neglected the more general and practical side of the subject and even such matters hitherto regarded in the light of professional secrets as trick and stage shooting, shooting in the dark etc. are treated in detail not previously.
