R. Bullivant, A. Finney, 1998

From Concept to Completion A. R. Bullivant, A. Finney, 1998-02-28 This guide highlights the responsibilities and obligations placed on manufacturers of apparatus ie electrical and electronic components finished products systems and installations that fall within the scope of the European Commission s Electromagnetic Compatibility Directive 89 336 EEC It provides an internal EMC code of practice and quality assurance system which can be referred to during the design procurement production development and approval stages of the apparatus development life cycle and beyond thus ensuring that EMC engineering practices are considered throughout the development process The particular approach taken will have to be tailored for each apparatus type and for the compliance route from components to finished products to systems and to installations but should in general be applicable to variants of a particular apparatus type Guidance is given on the interpretation of the EMC Directive the methods by which to show compliance with it and the strategies frameworks and policies which should be in place **Operational Templates and Guidance for EMS Mass Incident Deployment**

Federal Emergency Management Agency, U.S. Fire Administration, 2012-06 Emergency Medical Services EMS agencies regardless of service delivery model have sought guidance on how to better integrate their emergency preparedness and response activities into similar processes occurring at the local regional State tribal and Federal levels The primary purpose of this project is to begin the process of providing that guidance as it relates to mass care incident deployment While not a comprehensive guidance document this project should serve as a foundation for further development of EMS specific policies

and templates that improve EMS readiness to manage the full spectrum of hazards that face their communities
