Communicating with Kids Stephanie Davies-Arai,2015-01-28 Confused by all the conflicting parenting advice you hear Not sure who is right or what to do Well relax and read this book Ever wondered why your child gets more upset the nicer you are Or why your child is always arguing with you doesn t listen or seems intent on doing the opposite of what you want Now you no longer have to worry Communicating with Kids has the answers This new book explains how so often children are not resisting our messages but the way we are sending them It demonstrates why some of the ways we communicate lead to exactly the opposite of the behaviour we want and provides

methods to tweak your language and approach so that children are willing to help you So much of the parenting advice we hear works against a child's developing brain so this book shows you how to work with it instead which makes all the difference Once you understand the difference between what you are saying and what your child actually hears life with children becomes so much easier This book is all about communication because apart from that there's no other advice you need the best way to bring up your child is to be yourself and do it your way Communicating with Kids is a book guaranteed to help all parents whether they veer towards the methods of Penelope Leach or Supernanny or have never read a parenting book before It is not based on any parenting ideology but on genuine experience with a wide range of children It is a plain talking book that presents communication methods that work so parents gain the confidence to be themselves *Life Coaching for Kids* Nikki Watson,2014-04-21 Life coaching is a great way to help young people build self esteem set positive goals and deal with issues such as bullying anxiety and poor body image This practical guide to coaching young people aged 9-16 covers how it works the benefits and how to do it Fun activities with photocopiable worksheets to use in practice are included Kids Across the Spectrums Meryl Alper,2023-08-15 An ethnographic study of diverse children on the autism spectrum and the role of media and technology in their everyday lives In spite of widespread assumptions that young people on the autism spectrum have a natural attraction to technology a premise that leads to significant speculation about how media helps or harms them relatively little research actually exists about their everyday tech use In Kids Across the Spectrums Meryl Alper fills this gap with the first book length ethnography of the digital lives of autistic young people Based on research with more than sixty neurodivergent children from an array of racial ethnic and socioeconomic backgrounds Kids Across the Spectrums delves into three overlapping areas of their media usage cultural belonging social relationships and physical embodiment Alper's work demonstrates that what autistic youth do with technology is not radically different from their non autistic peers However significant social and health inequalities including limited recreational programs unsafe neighborhoods and challenges obtaining appropriate therapeutic services spill over into their media habits With an emphasis on what autistic children bring to media as opposed to what they supposedly lack socially Alper argues that their relationships do not exist outside of how communication technologies affect sociality nor beyond the boundaries of stigmatization and society writ large Finally she offers practical suggestions for the education healthcare and technology sectors to promote equity inclusion access and justice for autistic kids at home at school and in their communities *The Big Book of Dyslexia Activities for Kids and Teens* Gavin Reid,Nick Guise,Jennie Guise,2018-10-18 Full of interesting and creative activities for children and young people aged 5-19 with dyslexia this book is an essential guide for teachers and parents Focusing on practical and accessible projects the guide will cover key skills such as listening memory talking and writing **Public Policy Praxis** Randy S.
