**Was It Really Like That?** Gino Gammaldi, 2019-09-11 Gino Gammaldi has a clear memory of the early beginnings of his family who migrated

from Italy to Australia in the mid 1950s and has tried to portray those memories in this book in a manner that is sure to engage everyone's interest. Much of the earlier parts of this book are written through the eyes of a child growing up among everything that should probably relate only to those who are adult enough to cope with such hardships, temptations, sorrows, and disappointments. But as a child, these elements became a part of the simple life that was as normal as anything one could imagine. But in later stages, Gino also remembers all the good and fun times, and he portrays these beautifully and graphically through the many characters you will encounter in the two volumes of his book. He brings them to life and engages the reader simply by the humour and by the special qualities that each one of these characters magnifies, and how all of these experiences impacted on his own life. *Encyclopedia of the British Novel* Virginia Brackett, Victoria Gaydosik, 2015-04-22

Praise for the print edition comprehensive Recommended **The (Almost) Complete Hitchhiker in Time** Shawn M. Tomlinson, 2015-11-07 The Hitchhiker in Time columns were the single most popular things ever written by Shawn M. Tomlinson, which honestly doesn't say all that much. All together they appeared in fewer than 10 newspapers between 1988 and 2001. Well, multiple copies of those newspapers, of course. The highest circulation was approximately 40,000, so not exactly Bob Greene levels. Still, Tomlinson had a following with these columns, and to a great extent they hold up well today. Either that, or Tomlinson would like to think so. Many of these columns appeared in chapbooks over the years, but this is the first full collection of them to be in print. *Metadata* Jeffrey Pomerantz, 2015-11-13 Everything we need to know about metadata, the usually invisible infrastructure for information with which we interact every day. When metadata became breaking news, appearing in stories about surveillance by the National Security Agency, many members of the public encountered this once obscure term from information science for the first time. Should people be reassured that the NSA was only collecting metadata about phone calls, information about the caller, the recipient, the time, the duration, the location, and not recordings of the conversations themselves? Or does phone call metadata reveal more than it seems? In this book, Jeffrey Pomerantz offers an accessible and concise introduction to metadata. In the era of ubiquitous computing, metadata has become infrastructural, like the electrical grid or the highway system. We interact with it or generate it every day. It is not Pomerantz, tell us just data about data. It is a means by which the complexity of an object is represented in a simpler form. For example, the title, the author, and the cover art are metadata about a book. When metadata does its job well, it fades into the background, everyone except perhaps the NSA takes it for granted. Pomerantz explains what metadata is and why it exists. He distinguishes among different types of metadata: descriptive, administrative, structural, preservation, and use, and examines different users and uses of each type. He discusses the technologies that make modern metadata possible, and he speculates about metadata's future. By the end of the book, readers will see metadata everywhere. Because Pomerantz warns us it's metadata's world, and we are just living in it. **Bond Guide**, 1982 **Unfolding the Cards** Ian Damerell, 2015-03-03 These essays attempt to confront the effect of years of postmodernity and its promotion of individuality at the cost of solidarity and communal spirit. In the

wake of this it suggests possible frameworks for an art study that restores a certain focus on communal spirit It proposes too that art study's fragile position in contemporary society is a consequence of over commercialisation and its resultant surface values Consumerist and corporate ideology encourage the consumer individual's self realisation seemingly divorced from communal interests Within this isolation lies the potential breakdown of ethics Therefore I dream of a kinder society i.e. one where we are engaged in realising the community as its citizens This is not blind obedience but in a spirit of contributing to a whole society More specifically it means allowing and to a degree maintaining art study as a sphere of possibilities for budding citizen artists It is envisaging art study as a discursive arena and creating an academic space that allows for art's main contribution the dislodging of the so called proper i.e. entrenched doctrine I believe that art study can contribute to the improving of society in the main because art enacts a different sharing of the sensible
