Designing Interaction and Interfaces for Automated Vehicles Neville Stanton, Kirsten M. A. Revell, Patrick Langdon, 2021-03-10 Driving automation and autonomy are already upon us and the problems that were predicted twenty years ago are beginning to appear These problems include shortfalls in expected benefits equipment unreliability driver skill fade and error inducing equipment designs Designing Interaction and Interfaces for Automated Vehicles User Centred Ecological Design and Testing investigates the difficult problem of how to interface drivers with automated vehicles by offering an inclusive human centred design process that focusses on human variability and capability in interaction with interfaces This book introduces a novel method that combines both systems thinking and inclusive user centred design It models driver interaction provides design specifications concept designs and the results of studies in simulators on the test track and in road going vehicles This book is for designers of systems interfaces interactions UX Human Factors and Ergonomics researchers and practitioners involved with systems engineering and automotive academics

In this book Prof Stanton and colleagues show how Human Factors methods can be applied to the tricky problem of interfacing human drivers with vehicle automation They have developed an approach to designing the human automation interaction for the handovers between the driver and the vehicle This approach has been tested in driving simulators and most interestingly in real vehicles on British motorways The approach called User

Centred Ecological Interface Design has been validated against driver behaviour and used to support their ongoing work on vehicle automation I highly recommend this book for anyone interested or involved in designing human automation interaction in vehicles and beyond Professor Michael A Regan University of NSW Sydney AUSTRALIA Feature and Narrative Storytelling for Multimedia Journalists Duy Linh Tu, 2015-01-09 Feature and Narrative Storytelling for Multimedia Journalists is the first text that truly focuses on the multimedia and documentary production techniques required by professional journalists Video and audio production methods are covered in rich detail but more importantly various storytelling techniques are explored in depth Likewise author Duy Linh Tu tackles the latest topics in multimedia storytelling including mobile reporting producing and publishing while also offering best practices for using social media to help promote finished products Whether you re a student a professional seeking new techniques or simply looking to update your skills for the new digital newsroom this book will provide you with the information and tools you need to succeed as a professional journalist Integrated The lessons in this book deftly combine traditional media production principles with storytelling craft It is written with the perspective of modern professional journalists in mind Practical While rich with theory this text is based on the real world work of the author and several of his colleagues It features Q As with some of the best editors and video producers from top publications including NPR Vice and Detroit Free Press as well as profiles of leading video news organizations such as Frontline Mediastorm and Seattle Times Proven The author uses pedagogy from the world renowned Columbia Journalism School as well as case studies from his own award winning work Interactive The text is exercise and drill based and the companion website provides multimedia examples and lesson files as well as tutorials case studies and video interviews
