

# HTTP Request Methods

**GET**

Retrieves data or resource from a specified URL. It is used to retrieve information without modifying it.

**POST**

Submit data or creates a new resource on the server. It is used to send data to be processed by the server. It often results in the creation of a new resource on the server.

**PUT**

Updates the existing resource with the new data. It replaces the entire resource or creates it if it does not exist.

**DELETE**

Deletes the specified resource from the server.

**PATCH**

Partially updates the existing resource with the provided data. PATCH request does not create a new resource if the specified resource does not exist on the server.

**HEAD**

Retrieve only the headers of a response. It is used to check the status or headers of a resource without fetching the actual content.

**OPTIONS**

Fetch or Retrieve the allowed methods and other information of the specified resource.

**TRACE**

The TRACE method echoes back the received request to the client, allowing clients to inspect the request and see any modifications or additions made by intermediaries. It is mainly used for the diagnostic purposes.

**CONNECT**

Converts the request connection to a transparent TCP/IP tunnel, commonly used for establishing secure SSL/TLS connections through proxies.
