

Control SB210

Dual 10" Indoor/Outdoor
High Output
Compact Subwoofer

Key Features:

- 2 x 250 mm (10 in.) Aluminum/Ceramic Composite Cone Drivers
- 400 Watts Power Handling
- Fully Outdoor Capable Design
- SonicGuard™ Overload Protection
- 13 x M6 Suspension Inserts, Including Inserts for Optional U-Bracket
- AV Shielded
- Compact, Low Profile Design

The Control SB210 provides low frequency reinforcement for a wide variety of sound system applications. Its compact size, high output and outdoor capable design makes it one of the most versatile subwoofers in the installation market.

The internal angled baffle allows for a large port opening and compact front dimensions without compromising driver size. The SB210 produces warm, punchy low-end sound.

The Aluminum/Ceramic Composite Diaphragm 10" Drivers are rated for pink noise power handling of 200 Watts each, providing 400 Watts (1600 Watt peaks) of system power handling. The dual driver design also allows for stereo operation of the enclosure and provides great flexibility when used with one of the optional network accessory kits. Choose the MTC-210-SAT network accessory to drive a full subwoofer/satellite system with one amplifier. The network receives a stereo or mono source, and sends a high-passed 4-Ohm or 8-Ohm Satellite output signal for operation with other Control loudspeakers. The MTC-210T-SAT network can be used in same manner when using a 70.7/100-Volt distributed signal line.

Included with the SB210 are four feet and four receptacles to allow floor and shelf mounting as well as reliable stacking of multiple units. The thirteen M6 insert points allow for installation using forged shoulder eyebolts for suspending the subwoofer. The Optional U-Bracket MTC-210UB allows for additional versatility in mounting.

The High Impact PolyStyrene (HIPS) cabinet is available in black or white (SB210-WH) and is paintable. The thermostat composite-coated grille stands up to UV as well as humidity and direct exposure to water. The grille is backed with a combination of materials that, while acoustically transparent, prevent the intrusion of water into the cabinet even when hit directly, such as from rain or a sprinkler.

^c Calculated from sensitivity and power handling. Power compression is not considered.

JBL continually engages in research related to product improvement. Some materials, production methods and design refinements are introduced into existing products without notice as a routine expression of that philosophy. For this reason, any current JBL product may differ in some respect from its published description, but will always equal or exceed the original design specifications unless otherwise stated.
