Abstract: *Staphylococcus aureus* is a leading cause of nosocomial infection. The purpose of this study was to determine the prevalence of *S. aureus* in the hospital environment and to identify risk factors for colonization. A total of 100 samples were collected from various hospital environments. The results showed that 60% of the samples were positive for *S. aureus*. The highest prevalence was found in the intensive care unit (ICU) and the operating room. Risk factors for colonization included contact with the ICU, contact with the operating room, and contact with medical equipment.
