**Advances in Energy and Sustainability** Sudipta De, Prokash Chandra Roy, 2024-12-23 This volume presents select papers from the International Conference on Mechanical Engineering INCOM 2024 describing recent advances in the field of energy and sustainability. Various topics covered in this volume are alternative fuels, energy conversion technologies, renewable energy resources and efficient utilization, waste to energy, storage, sustainable energy policy, energy economics and efficiency, energy management, environmental impact assessment of energy systems, industry innovations in energy, electric vehicles, hydrogen economy, etc. The book will be a valuable reference for researchers and professionals interested in the field of energy and sustainability. **Nuclear Science Abstracts**, 1974-07 **Windpower Ownership in Sweden** Tore

Wizelius, 2014-06-20 Windpower is a modular technology and compared to most other power plants also rather small scale. Wind turbines are installed to the distribution grid which is called distributed generation. Ownership and revenues can be distributed as well using the right ownership models. Several different ownership models used in different countries like windpower cooperatives, local limited companies, net accounting models, etc. are described. These models can be used to make windpower become community power and/or consumer owned power and produce power for these owners at cost price. To wait for the international community to agree on international treaties to create a renewable energy system takes too long. The climate disaster will inevitably happen. To speed up the transition to a renewable energy system, development has to come from below from local communities which can initiate and invest in windpower and other renewables. At the same time to get off from the oligopolistic electric power market and produce power at cost price is a good business. Scientific and
