Systems Practice: How to Act in a Climate Change World Ray Ison, 2010-07-20 It is now accepted that humans are changing the climate of the Earth and this is the most compelling amongst a long litany of reasons as to why collectively we have to change our ways of thinking and acting Most people now recognise that we have to be capable of adapting quickly as new and uncertain circumstances emerge this capability will need to exist at personal group community regional national and international levels all at the same time Systems Practice is structured into four parts Part I introduces the societal need to move towards a more systemic and adaptive governance against the backdrop of human induced climate change Part II unpacks what is involved in systems practice by means of a juggler metaphor examining situations where systems thinking offers useful understanding and opportunities for change Part III identifies the main factors that constrain the uptake of systems practice and makes the case for innovation in practice by means of systemic inquiry systemic action research and systemic intervention The book concludes with Part IV which critically examines how systems practice is or might be utilised at different levels from the personal to the societal The development of our capabilities to think and act systemically is an urgent priority and Systems Practice aims to show how to do systems thinking and translate that thinking into praxis theory informed practical action which will be welcomed by those managing in situations of complexity and uncertainty across all domains of professional and personal concern

Methods, Models, Simulations and Approaches Towards a General Theory of Change Gianfranco Minati, 2012 Other approaches are based on considering 1 periodic changes in structure as for processes of self organisation 2 non periodic but coherent changes in structure as for processes of emergence 3 the quantum level of description Papers in the book study the problem considering its transdisciplinary nature i.e. systemic properties studied per se and not within specific disciplinary contexts The aim of these studies is to outline a

transdisciplinary theory of change in systemic properties Such a theory should have simultaneous corresponding and eventually hierarchical disciplinary aspects as expected for a general theory of emergence

Theoretical Biochemistry Leif A. Eriksson, 2001-02-19 Theoretical chemistry has been an area of tremendous expansion and development over the past decade from an approach where we were able to treat only a few atoms quantum mechanically or make fairly crude molecular dynamics simulations into a discipline with an accuracy and predictive power that has rendered it an essential complementary tool to experiment in basically all areas of science This volume gives a flavour of the types of problems in biochemistry that theoretical calculations can solve at present and illustrates the tremendous predictive power these approaches possess A wide range of computational approaches from classical MD and Monte Carlo methods via semi empirical and DFT approaches on isolated model systems to Car Parinello QM MD and novel hybrid QM MM studies are covered The systems investigated also cover a broad range from membrane bound proteins to various types of enzymatic reactions as well as inhibitor studies cofactor properties solvent effects transcription and radiation damage to DNA
