Fishing gear recycling technologies and practices Food and Agriculture Organization of the United Nations, 2023-11-07

This document is a report on the technical aspects and current examples of fishing gear recycling as an option for end of life fishing gear waste management and pollution control. The report also discusses fishing gear recycling options in the context of circular economy and Extended Producer Responsibility (EPR) principles. This report will be used for knowledge sharing, dissemination, and capacity building purposes. It will assist with planning of GloLitter Partnerships pilot projects around cost-benefit analyses for end of life fishing gear port reception facilities which can support fishing gear recycling. It will also assist with planning of GloLitter Partnerships phase II pilot projects to practically implement the proposed fishing gear recycling management systems and incentive schemes. The objectives of the report are to summarize current fishing gear recycling technologies, share global case studies of fishing gear recycling initiatives, review the application of circular economy and Extended Producer Responsibility (EPR) principles to fishing gear recycling, discuss trade-offs between available fishing gear recycling options, and recommend best practices for fishing gear recycling under differing socioeconomic and environmental contexts that progress circular economy and EPR principles.

Introduction to Environmental Engineering 4e contains the essential science and engineering principles needed for introductory courses and used as the basis for more advanced courses in environmental engineering. Updated with latest EPA regulations, Davis and Cornwell apply the concepts of sustainability and materials and energy balance as a means of understanding and solving environmental engineering issues. With 650 end of chapter problems as well as provocative discussion questions and a helpful list of review items found at the end of each chapter, the text is both a comprehensible and comprehensive tool for any environmental engineering course.
