Teaching and Researching Reading William Grabe, Fredricka L. Stoller, 2019-09-24 Now in its third edition *Teaching and Researching Reading* charts the field of reading first and second language systematically and coherently for the benefit of language teaching practitioners students and researchers This volume provides background on how reading works and how reading differs for second language learners The volume includes reading curriculum principles evidence based teaching ideas and a multi step iterative process for conducting meaningful action research on reading related topics The volume outlines 14 projects for teacher adaptation and use as well as numerous new and substantially expanded resource materials that can be used for both action research and classroom instruction

International Handbook of Behavior Modification and Therapy Alan S. Bellack, Michel Hersen, Alan E. Kazdin, 2012-12-06 It is particularly gratifying to prepare a second edition of a book because there is the necessary implication that the first edition was well received Moreover now an opportunity is provided to correct the problems or limitations that existed in the first edition as well as to address recent developments in the field Thus we are grateful to our friends colleagues and students as well as to the reviewers who have expressed their approval of the first edition and who have given us valuable input on how the revision could best be structured Perhaps the first thing that the reader will notice about the second edition is that it is more extensive than the first The volume currently has 41 chapters in contrast to the 31 chapters that comprised the earlier version Chapters 3 9 29 and 30 of the first edition either have been dropped or were combined whereas 14 new chapters have been added In effect we are gratified in being able to reflect the continued growth of behavior therapy in the 1980s Behavior therapists have addressed an ever increasing number of disorders and behavioral dysfunctions in an increasing range of populations The most notable advances are taking place in such areas as cognitive approaches geriatrics and behavioral medicine and also in the treatment of childhood disorders
