responsible for keeping a person's fluids balanced and putting fluids into the blood. It is also responsible for making leukocytes and antibodies to help fight infection and disease. A chart of how the lymphatic system works would show you all the capillaries, vessels, and nodes that make up the system. Some charts will even show you in detail how things flow in and out of each node and filter out through the body.

Endocrine System (Speedy Study Guide) Speedy Publishing LLC, 2014-06-12. The Endocrine System is the body's bridge between nervous and glandular functions. All chemicals released in the body likely do so through an endocrine response. In order to design exercise, dietary, and supplement regimens to aid the body's performance, a basic knowledge of the roles of each element of the Endocrine System is required. Illness and other physical maladies are most evident in the body through the performance of organs and glands. Endocrine System analysis and regulation is key to providing the best environment for a healthy body.
