Valuing Environmental Amenities Using Stated Choice Studies Barbara J. Kanninen, 2007-05-31 When I was a graduate student I fell in love with choice models After years studying the econometrics of the standard linear model discrete choice offered so many new cool twists With contingent valuation CV studies abounding data was plentiful and varied Every CV dataset had its own kinks and quirks that begged to be addressed through innovative modeling techniques Dissertation topics were not scarce We economists like to assume There are jokes written about this My assumption as I slaved over the statistical properties of the double bounded CV model was that CV data was good data representing valid economic choices made by survey respondents Before I received my Ph D this assumption was called into question big time In 1989 the Exxon Valdez oil tanker spilled 11 million gallons of oil into Prince William Sound Alaska The accident killed a lot of birds devastated fisheries harmed area economies and ruined a reputation or two It also changed the field of environmental valuation What was once a research field dominated by environmental economists interested in obtaining nonmarket values for environmental amenities was now a legal battleground pitting environmental economists against traditional economists who were skeptical of the techniques and procedures used with CV If Nobel prizes are indicators of quality and I m fairly certain they are the Exxon Valdez oil spill drew the best and the brightest to scrutinize our field

Her purpose was fueled by four powerful reasons: to add texture to her writing, to ward off dementia, to enhance structure in her life, and to inspire her two young grandsons to continue their education after high school. But as she stepped onto the campus of Canada's third largest university, Blackwood had no idea of the hurdles she was about to face. In a retelling of her journey into a new beginning, Blackwood details how, after enrolling in York University, she struggled to maintain her established lifestyle, attend class with hard-to-connect-with millennials, and face a series of challenges that included two strikes at the university, a campus lockdown during the COVID-19 pandemic, and a shocking health diagnosis in her final year of studies. While leaning on the university's motto, "the way must be tried," Blackwood tells an inspiring story of how she persevered and learned to rely on her faith as she bravely conquered her fears and vulnerabilities to eventually achieve her goal. *College Life of a Retired Senior* is
