Regulation Thomas Pfannschmidt, Jeannette Pfalz, 2016-09-13 Plastids are plant cell specific organelles of endosymbiotic origin that contain their own genome the so called plastome Its proper expression is essential for faithful chloroplast biogenesis during seedling development and for the establishment of photosynthetic and other biosynthetic functions in the organelle The structural organisation replication and expression of this plastid genome thus has been studied for many years but many essential steps are still not understood Especially the structural and functional involvement of various regulatory proteins in these processes is still a matter of research Studies from the last two decades demonstrated that a plethora of proteins act as specific regulators during replication transcription post transcription translation and post translation accommodating a proper inheritance and expression of the plastome Their number exceeds by far the number of the genes encoded by the plastome suggesting that a strong evolutionary pressure is maintaining the plastome in its present stage The plastome gene organisation in vascular plants was found to be highly conserved while algae exhibit a certain flexibility in gene number and organisation These regulatory proteins are therefore an important determinant for the high degree of conservation in plant plastomes A deeper understanding of individual roles and functions of such proteins would improve largely our understanding of plastid biogenesis and function a knowledge that will be essential in the development of more efficient and productive plants for agriculture The latter represents a major socio economic need of fast growing mankind that asks for increased supply of food fibres and biofuels in the coming decades despite the threats exerted by global change and fast spreading urbanisation *Ward's Anaesthetic Equipment* Andrew J Davey, Ali Diba, 2012-12-07 First prize winner Anesthesia Book Category British Medical Association 2012 Medical Book Competition Lavishly illustrated by clear line diagrams and photographs Ward's Anaesthetic Equipment is a highly accessible single source to aid understanding of the key principles behind equipment function and design This sixth edition of the classic reference text on anaesthetic equipment is again extensively revised to reflect the very latest advances Ward's is an invaluable resource for qualified anaesthetists as well as essential reading for those in training or approaching examinations such as those of the Primary and Final Fellowship in the UK and Ireland Trainees in Intensive Care Medicine anaesthetic assistants operating department practitioners
