In addition to the five main windows, SketchUp also includes several other windows, such as the Components window that's open in Figure 1-1. You can open and close these as needed by using the Window menu. With the tools in these windows, you'll apply color and shading to your models, select prefabricated components, add shadows and lighting effects, and export your project.

Don't Be Afraid to Play

When you get started, don't be afraid to play. SketchUp is a 3D modeling software, and it's designed to be fun. You can create a 3D model of anything you can imagine, and you can see it from any angle. You can also use the tools in the SketchUp window to apply color and shading to your models, select prefabricated components, add shadows and lighting effects, and export your project.

SketchUp's menu bar is styled with the most popular, such as File, Edit, Window, and Help. SketchUp's View menu is a little different from the ones in most programs (Figure 1-2). The View menu has items in the SketchUp window that you can draw or hide, including things like drawing guides, wireframe, transparency, and view different models. If you're looking for tools that change over time of the SketchUp window, such as a View or the tool, look under the View menu.
