Critically Reading the Theory and Methods of Archaeology Guy Gibbon, 2013-09-12 Critically Reading the Theory and Methods of Archaeology stands out as the most thorough and practical guide to the essential critical reading and writing skills that all students instructors and practitioners should have It provides priceless insight for the here and now of the Theory and Methods of Archaeology classes and for a lifetime of reading learning teaching and writing Chapters focus on rigorous reasoning skills types of argument the main research orientations in archaeology the basic procedural framework that underlies all schools of archaeology and issues in archaeology raised by skeptical postmodernists **Christian Logic** Stephen Wuest, 2024-10-25 This text is about fusing logic and moral theory and is definitely from a Christian worldview It is written on a level for AP high school or at most second year college use But the text is for Christian laypeople The goals of this book include presenting modern deductive logic modern logical notation and the twenty rules of inference These describe what modern deductive logic is However orthodox Christians must go further they must be exposed to historical moral ethical ME models And they must think carefully about how to integrate Christian morality into modern logic and use this fusion to have a sound methodology to analyze modern arguments Given the popularity of logically incoherent conspiracy theories this approach to formal logic enters through the door of what historical Christians would call roughly our shared reality Also given the abundance of partial or invalid or unsound arguments that Americans encounter the analysis of arguments in this book will heavily deal with dysfunctional arguments Putting these topics together in a synthesized way in a Christian worldview results in a product that reasons across disciplines and is perhaps politically incorrect But the author is convinced that this combination of skills is what American Christians need **Logik und Mathematik:** **Frege-Kolloquium, Jena, 1993 (Perspectives in Analytical Philosophy)** Ingolf Max, Werner Stelzner, 1995 Keine ausführliche Beschreibung für Logik und Mathematik verfügbar
