Fin De L'Occident Naissance Du Monde:

Fin de l'Occident, naissance du monde Hervé Kempf, 2013 Cessons de nous raconter des histoires sur la crise Et regardons de face le cœur du problème qui se pose la société humaine en ce début du XXI^e siècle les contraintes écologiques interdisent que le niveau de vie occidental se généralise l'échelle du monde Il devra donc baisser pour que chacun ait sa juste part Autrement dit l'appauvrissement matériel de l'Occident est inévitable Comment allons nous vivre cette mutation en changeant nos sociétés pour nous adapter au mieux ce nouveau monde ou en nous opposant au sens de l'histoire au prix d'un déclassement de la violence Déjà en cours de traduction dans plusieurs langues ce récit phosphorescent d'idées originales prend comme fil conducteur les tribulations de l'humanité depuis son apparition sur terre Captivant et rebours du discours dominant il nous invite à une dérangeante lucidité Mais ce livre est galement habité par un optimisme communicatif oui un nouveau monde est possible

Critical Theory of Coloniality Paulo Henrique Martins, 2022-04-19 This book reveals how the critique of the domination of capitalism inaugurated by the Frankfurt School becomes pluriversal motivating the historical Critical Theory of Coloniality CTC dialogue between the Global South and the Global North CTC expresses the emergence and historical actuality of a set of intellectual fields aimed at denouncing domination and promoting emancipatory ideas at the borders of colonial capitalism The book argues that the actuality of the CTC relies on the importance of valuing theoretical and methodological pluralism in the context of the necessary redefinition of the directions of global society It reveals a plural reflection of scientific moral and aesthetic character in different areas of former planetary colonisation such as Asia Africa and America but also on the borders of Europe This book is aimed at researchers and students in the social sciences as well as in interdisciplinary studies It is attractive to those who are interested in the plural development of theoretical criticism outside the European universe and who seek to understand how capitalist power has metamorphosed with planetary coloniality Considering this book implies important reflections on topics such as development modernity tradition imperialism dependency and democracy it is interesting to specialists in development issues international relations and policymakers

Cataclysms Laurent Testot, 2020-11-09 Humanity is by many measures the biggest success story in the animal kingdom but what are the costs of this triumph Over its three million years of existence the human species has continuously modified nature and drained its resources In Cataclysms Laurent Testot provides the full tally offering a comprehensive environmental history of humanity's unmatched and perhaps irreversible influence on the world Testot explores the interconnected histories of human evolution and planetary deterioration arguing that our development from naked apes to Homo sapiens has entailed wide scale environmental harm Testot makes the case that humans have usually been catastrophic for the planet hyperpredators responsible for mass extinctions deforestation global warming ocean acidification and unchecked pollution as well as the slaughter of our own species Organized chronologically around seven technological revolutions Cataclysms unspools the intertwined saga of humanity and our environment from our shy

beginnings in Africa to today's domination of the planet revealing how we have blown past any limits along the way whether by exploding our own population numbers domesticating countless other species or harnessing energy from fossils Testot's book while sweeping is light and approachable telling the stories sometimes rambunctious sometimes appalling of how a glorified monkey transformed its own environment beyond all recognition In order to begin reversing our environmental disaster we must have a better understanding of our own past and the incalculable environmental costs incurred at every stage of human innovation Cataclysms offers that understanding and the hope that we can now begin to reform our relationship to the Earth

Poetics of the Earth Augustin Berque, 2019-04-25 Poetics of the Earth is a work of environmental philosophy based on a synthesis of eastern and western thought on natural and human history It draws on recent biological research to show how the processes of evolution and history both function according to the same principles Augustin Berque rejects the separation of nature and culture which he believes lies at the root of the environmental crisis This book proposes a three stage process of re worlding moving away from the individualized self to become a part of the common world re concretizing understanding the meaning and historical development of words and things and re engaging reconsidering the relationship between history and subjectivity at every level of being in order to bring western thought on nature and culture into sustainable harmony and alignment This book will be of great interest to students and scholars of environmental studies environmental philosophy Asian studies and the natural sciences

L'écriture de Rachid Boudjedra ZELICHE Mohamed-Salah, 2005-01-01 L'ouvrage propose une lecture de l'oeuvre de Rachid Boudjedra Refusant d'embrasser ce qui pourrait être une attitude de surplomb distant l'auteur nous fait entrer au coeur de l'univers ardent d'un crivain contestable et contesté Dans cette perspective il nous invite d'abord considérer la question des origines qui prend souvent chez Boudjedra la forme d'une quête prouvante Puis il montre comment le texte de Boudjedra peut se lire comme un dialogue ininterrompu avec quelques grands intercesseurs
